2016 REWIND

1

00:00:03,760 --> 00:00:06,320

2016 brought NASA a year of exciting observations.

2

00:00:06,560 --> 00:00:08,800

2016 brought NASA a year of historic discoveries.

3

00:00:09,200 --> 00:00:11,120

2016 brought NASA a year of significant milestones.

4

00:00:12,160 --> 00:00:18,960

NASA's first asteroid sampling mission, OSIRIS-REx launched into space.

5

00:00:19,760 --> 00:00:23,760

Operation IceBridge measured Antarctic ice for the eighth consecutive year.

6

00:00:24,640 --> 00:00:31,120

A mid-latitude super pressure balloon completed a record-breaking, 46-day test flight.

7

00:00:32,000 --> 00:00:37,360

Hubble helped determine the observable universe contains 10 times more galaxies than previously thought.

8

00:00:38,240 --> 00:00:44,720

NASA supercomputers provided a new view of how carbon dioxide moves through the atmosphere.

9

00:00:46,000 --> 00:00:51,200

NASA's Solar Dynamics Observatory watched Mercury transit the sun.

10

00:00:52,000 --> 00:00:58,320

Scientists used small fluctuations in the orbits of three NASA spacecraft to map the gravity field of Mars.
