

CATS data helps scientists improve climate models and monitor near-real-time events on Earth, including pollution, volcanos, wildfires, and more.

1
00:00:01,720 --> 00:00:06,140

249 miles above Earth, NASA has a specialized laser mounted to the International Space Station.

2
00:00:06,160 --> 00:00:13,010

It's called CATS: The Cloud Aerosol Transport System, and it's designed to study the atmosphere.
