

Mar 07, 2017

1
00:00:04,040 --> 00:00:08,080

Every year, Arctic sea ice grows and extends through the winter.

2
00:00:12,100 --> 00:00:16,120

On March 7, 2017, Arctic sea ice reached its annual maximum extent, setting a new record low.

3
00:00:20,180 --> 00:00:24,220

A low September minimum extent and a warm winter contributed to the low Arctic ice maximum.
