

**REINER GAMMA**

1  
00:00:06,969 --> 00:00:05,139  
one of the strangest

2  
00:00:09,370 --> 00:00:06,979  
but most beautiful features on the moon are

3  
00:00:11,620 --> 00:00:09,380  
cionary eddies the most

4  
00:00:13,360 --> 00:00:11,630  
famous eddy reigns in gamma is a

5  
00:00:16,660 --> 00:00:13,370  
favorite target of

6  
00:00:19,120 --> 00:00:16,670  
amateur astronomers using data captured by the

7  
00:00:21,460 --> 00:00:19,130  
gunner and sensor view we now know

8  
00:00:24,099 --> 00:00:21,470  
that these eddies are the the result of

9  
00:00:26,429 --> 00:00:24,109  
local magnetic fields in the

10  
00:00:28,960 --> 00:00:26,439  
lunar crust acting as templates

11  
00:00:31,269 --> 00:00:28,970  
selectively blocking

12  
00:00:33,430 --> 00:00:31,279  
solar radiation and causing different parts

13  
00:00:35,950 --> 00:00:33,440

of the lunar surface to cool at
