2  
00:00:03,050 --> 00:00:06,080

A coronal mass ejection, or CME, erupted from the Sun on October 14, 2014

3  
00:00:06,080 --> 00:00:10,110

As it traveled through the solar system, it was detected by an unprecedented number of NASA and ESA space

4  
00:00:10,110 --> 00:00:14,130

This gives new insight into the evolution of CMEs and helps improve the models scientists use to predict their p
