

Kuiper Belt
Disc region of icy bodies

The Last Planet:
Neptune
Almost 3 billion miles
away

1

00:00:00,140 --> 00:00:04,240

<<music throughout>> Narrator: Where is the edge of the solar system?

2

00:00:04,260 --> 00:00:08,420

The answer is not

3

00:00:08,440 --> 00:00:12,450

so simple

4

00:00:12,470 --> 00:00:16,660

You could say

5

00:00:16,680 --> 00:00:20,870

it's where the planets end.

6

00:00:20,890 --> 00:00:25,040

But the sun's magnetism can be felt

7

00:00:25,060 --> 00:00:29,160

far beyond that.

8

00:00:29,180 --> 00:00:33,290

And the sun's gravity stretches even farther.

9

00:00:33,310 --> 00:00:37,440

Like everything

10

00:00:37,460 --> 00:00:41,630

in exploration, it depends on how far you are willing to go.

11

00:00:41,650 --> 00:00:45,820

music

12

00:00:45,840 --> 00:00:49,990

tone
