

1
00:00:01,480 --> 00:00:02,980
We only know of one planet

2
00:00:03,000 --> 00:00:08,900
that harbors life

3
00:00:08,920 --> 00:00:13,350
What makes Earth so special?

4
00:00:13,370 --> 00:00:19,290
The secret lies in its colors

5
00:00:19,310 --> 00:00:21,370
Color is an indicator of life

6
00:00:21,390 --> 00:00:22,000
But without a view from above

7
00:00:22,020 --> 00:00:27,000
It's impossible to see the entire picture

8
00:00:27,020 --> 00:00:27,910
In the last two decades

9
00:00:27,930 --> 00:00:33,260
NASA has elevated its study from orbit

10
00:00:33,280 --> 00:00:34,000
To continuously observe all planet life -

11
00:00:34,020 --> 00:00:44,250
On land and on the ocean's surface

12
00:00:44,270 --> 00:00:46,140
We now have the most complete view of global biology to data

13
00:00:46,160 --> 00:00:49,300

- and how it's changing

14

00:00:49,320 --> 00:00:52,270

Furthering knowledge of life
