

1
00:00:00,020 --> 00:00:04,060
[music]

2
00:00:04,080 --> 00:00:12,290
Something occasionally dims the star R2 Piscium. But what?

3
00:00:12,310 --> 00:00:16,370
New research confirms the star is a mere toddler,

4
00:00:16,390 --> 00:00:20,430
only 1 percent the Sun's age,

5
00:00:20,450 --> 00:00:28,690
and suggests that thick blobs of gas and dust erratically dim its light.

6
00:00:28,710 --> 00:00:32,740
The blobs may be planetary wreckage of a young world or worlds torn apart...

7
00:00:32,760 --> 00:00:41,020
and perhaps still dissolving today.

8
00:00:49,350 --> 00:00:45,160
[music]
