

1  
00:00:07,269 --> 00:00:04,870  
i looked through a telescope and saw

2  
00:00:10,070 --> 00:00:07,279  
saturn for the first time and like many

3  
00:00:11,910 --> 00:00:10,080  
other people it changed my life i got my

4  
00:00:14,070 --> 00:00:11,920  
first digital camera and started doing

5  
00:00:16,390 --> 00:00:14,080  
this just three and a half years ago you

6  
00:00:19,910 --> 00:00:16,400  
can do a lot with a digital camera right

7  
00:00:22,150 --> 00:00:19,920  
from a very urban area a light polluted

8  
00:00:25,269 --> 00:00:22,160  
area as we say all of these except one

9  
00:00:28,230 --> 00:00:25,279  
were taken from north of washington dc

10  
00:00:30,550 --> 00:00:28,240  
the one exception is comet hail bop it

11  
00:00:32,950 --> 00:00:30,560  
helps for comets to go to a dark

12  
00:00:34,549 --> 00:00:32,960  
location i tell people don't buy

13  
00:00:36,790 --> 00:00:34,559

something that you're not going to use

14

00:00:40,310 --> 00:00:36,800

the bigger your toys the harder they are

15

00:00:44,310 --> 00:00:40,320

to get out and use some years ago i put

16

00:00:46,389 --> 00:00:44,320

photography and poetry together and i'm

17

00:00:48,389 --> 00:00:46,399

better at actually sharing my poetry

18

00:00:51,110 --> 00:00:48,399

than my astrophotography the short one

19

00:00:54,229 --> 00:00:51,120

for example is behold the fleeting

20

00:00:57,510 --> 00:00:54,239

meteor his life so short

21

00:01:00,310 --> 00:00:57,520

his flame so bright

22

00:01:02,869 --> 00:01:00,320

he brings no second stroke
