

1
00:00:04,020 --> 00:00:08,140

As seas warm and ice melts, Earth's oceans have risen steadily.

2
00:00:12,160 --> 00:00:16,320

Now scientists say sea level rise is accelerating, according to a new study based on NASA data.

3
00:00:20,380 --> 00:00:24,390

In the past 25 years, sea level is not only rising, but the rate of that rise is getting faster.

4
00:00:28,460 --> 00:00:32,990

Increased ice melting in Greenland and Antarctica is primarily responsible for the acceleration.
