

Feb. 26, 2018

1
00:00:00,020 --> 00:00:04,200

It's midwinter in the Arctic, and the sun has yet to rise over the North Pole,

2
00:00:08,210 --> 00:00:12,420

But the Arctic is unusually warm for this time of year, with temperatures above freezing in the area north of Greenland.

3
00:00:16,490 --> 00:00:20,500

Sea ice in this region should be thick and strong, but satellite data show the ice breaking up, exposing open sea.
