

1
00:00:15,690 --> 00:00:16,310

Phytoplankton are microscopic plants in the oceans.

2
00:00:16,330 --> 00:00:18,720

Countless...

3
00:00:18,740 --> 00:00:24,260

...and the number of different kinds hard to quantify.

4
00:00:24,280 --> 00:00:39,690

That's biodiversity, and it's a delicate balance.

5
00:00:39,710 --> 00:00:45,190

Oceans cover the Earth, so phytoplankton health matters to you, too.
