

1
00:00:00,000 --> 00:00:01,117

■ Music ■

2
00:00:01,117 --> 00:00:04,120

Space

3
00:00:04,504 --> 00:00:07,257

There are so many
unanswered questions

4
00:00:07,490 --> 00:00:11,011

What else is out there?

5
00:00:11,261 --> 00:00:14,981

Are we alone?

6
00:00:15,265 --> 00:00:20,236

NASA continues to pioneer
the future in space exploration

7
00:00:20,537 --> 00:00:24,507

Designing

8
00:00:24,774 --> 00:00:28,244

Developing

9
00:00:28,528 --> 00:00:32,015

Testing new technologies

10
00:00:32,298 --> 00:00:35,752

The Robotic Refueling Mission 3

11
00:00:36,036 --> 00:00:39,773

with help from the
International Space Station

12
00:00:40,040 --> 00:00:44,027

Will demonstrate cutting-edge technologies

13

00:00:44,377 --> 00:00:48,732

And develop NASA's ability
to transfer and replenish

14

00:00:48,732 --> 00:00:53,319

cryogenic propellants in space

15

00:00:53,553 --> 00:00:55,989

Capabilities critical for longer
journeys to both near

16

00:00:55,989 --> 00:00:59,642

and distant orbits

17

00:00:59,926 --> 00:01:02,078

Facilitating exploration
beyond the reach of where

18

00:01:02,078 --> 00:01:04,447

humans can go today
