

1  
00:00:01,001 --> 00:00:05,506  
[Music]

2  
00:00:05,506 --> 00:00:09,209  
Beyond the asteroid belt  
are fossils of planet formation,

3  
00:00:09,209 --> 00:00:11,700  
known as the Trojan asteroids.

4  
00:00:12,646 --> 00:00:16,000  
These primitive bodies share  
Jupiter's orbit in two vast

5  
00:00:16,000 --> 00:00:19,019  
swarms, leading and  
trailing the planet.

6  
00:00:20,700 --> 00:00:24,024  
Now, NASA is preparing  
to visit seven asteroids.

7  
00:00:28,528 --> 00:00:32,199  
Embarking on a twelve-year  
odyssey that will span Jupiter's

8  
00:00:32,199 --> 00:00:33,200  
orbit.

9  
00:00:34,900 --> 00:00:38,800  
One mission will explore these  
objects for the first time.
