

2015 - 2019

1

00:00:05,010 --> 00:00:09,000

2019 was the second hottest year on record.

2

00:00:13,000 --> 00:00:17,010

Globally, temperatures were more than 2°F (1.11°C) warmer than the late 19th Century.

3

00:00:21,000 --> 00:00:25,010

During the northern summer, water pooled on top of the Greenland Ice Sheet as ice melted.

4

00:00:33,000 --> 00:00:37,000

Large, intense fires burned from Alaska and Siberia to Australia.

5

00:00:41,000 --> 00:00:45,000

This continues a long-term trend of warming around the world, driven by rising greenhouse gas levels.

6

00:00:49,010 --> 00:00:53,010

The last decade was the warmest on record.
