

A composite image featuring the Hubble Space Telescope in the foreground, positioned as if looking down at the Earth. The telescope's primary mirror and secondary mirror are visible, along with its solar panels and instruments. The Earth's horizon is shown with a blue atmosphere and white clouds. The text "HUBBLE" is written in large, bold, white capital letters across the center of the telescope's mirror, and "EYE IN THE SKY" is written in smaller, white capital letters below it.

# HUBBLE

EYE IN THE SKY

1  
00:00:27,750 --> 00:00:11,650

[Music]

2  
00:00:31,029 --> 00:00:29,509

in astronomy there's what we knew before

3  
00:00:33,030 --> 00:00:31,039

hubble and now there's what we know

4  
00:00:35,030 --> 00:00:33,040

after hubble they're so different of

5  
00:00:36,790 --> 00:00:35,040

course hubble has now had a life of 30

6  
00:00:39,590 --> 00:00:36,800

years so they had a long time to make

7  
00:00:41,910 --> 00:00:39,600

this revolution happen so it's not all
