

What has Hubble helped reveal about Jupiter's Great Red Spot?

1
00:00:13,030 --> 00:00:10,310

jupiter

2
00:00:16,230 --> 00:00:13,040

beautiful gas giant planet

3
00:00:17,670 --> 00:00:16,240

it's got bands and layers of atmosphere

4
00:00:21,349 --> 00:00:17,680

that you can see in those beautiful

5
00:00:23,109 --> 00:00:21,359

stripes it has a big storm a cyclone the

6
00:00:25,349 --> 00:00:23,119

great red spot

7
00:00:27,429 --> 00:00:25,359

well by observing that with hubble year

8
00:00:30,390 --> 00:00:27,439

after year we see that actually that

9
00:00:32,389 --> 00:00:30,400

storm is shrinking it's changing color a

10
00:00:34,389 --> 00:00:32,399

little bit new storms are cropping up we

11
00:00:37,430 --> 00:00:34,399

can actually watch the dynamics of

12
00:00:39,670 --> 00:00:37,440

change in the atmosphere of jupiter

13
00:00:42,310 --> 00:00:39,680

as we look at the outer planets in our

14

00:00:44,630 --> 00:00:42,320

solar system we can see them changing

15

00:00:46,549 --> 00:00:44,640

from year to year to year
