

**How wide is Hubble's  
primary mirror?**

1  
00:00:12,870 --> 00:00:10,709  
the hubble telescope mirror is a giant

2  
00:00:14,870 --> 00:00:12,880  
piece of glass eight feet across

3  
00:00:17,510 --> 00:00:14,880  
it's almost a parabolic mirror it's very

4  
00:00:18,870 --> 00:00:17,520  
powerful how far can you see the

5  
00:00:21,189 --> 00:00:18,880  
farthest we've been able to see with the

6  
00:00:23,429 --> 00:00:21,199  
hubble telescope goes back about
