

engineering towards the end of
my university career and then
made that transition into

tronaut

1
00:00:03,429 --> 00:00:01,829
i actually started off as a teenager

2
00:00:05,670 --> 00:00:03,439
thinking that i wanted to go work for

3
00:00:07,909 --> 00:00:05,680
nasa one day and so i studied aerospace

4
00:00:09,830 --> 00:00:07,919
engineering initially at university but

5
00:00:12,150 --> 00:00:09,840
i became interested in ocean engineering

6
00:00:14,230 --> 00:00:12,160
towards the end of my university career

7
00:00:15,990 --> 00:00:14,240
and then made that transition into

8
00:00:17,269 --> 00:00:16,000
studying the oceans but always with the

9
00:00:18,870 --> 00:00:17,279
idea in the back of my mind that

10
00:00:20,630 --> 00:00:18,880
wouldn't it be great to work for nasa

11
00:00:22,950 --> 00:00:20,640
one day only thing that i was really

12
00:00:23,990 --> 00:00:22,960
good in high school was that

13
00:00:30,310 --> 00:00:24,000

math

14

00:00:32,310 --> 00:00:30,320

really easy that was the only thing i

15

00:00:34,470 --> 00:00:32,320

was good at

16

00:00:36,630 --> 00:00:34,480

my counselor of course said

17

00:00:38,389 --> 00:00:36,640

engineering is for you i think just my

18

00:00:40,470 --> 00:00:38,399

interest in

19

00:00:42,790 --> 00:00:40,480

in math and science

20

00:00:44,950 --> 00:00:42,800

pushed me towards engineering and one

21

00:00:49,220 --> 00:00:44,960

and liking we're learning about how
