

# PHOTON PHRIGHTDAY

**MCQINT TERROR**

1  
00:00:03,103 --> 00:00:05,972  
Photon Phrightday

2  
00:00:06,006 --> 00:00:09,042  
Greetings, ICESat-2 fans,

3  
00:00:09,042 --> 00:00:11,811  
today for Halloween, we bring you

4  
00:00:11,811 --> 00:00:15,582  
a very special Photon Phrightday

5  
00:00:15,582 --> 00:00:18,051  
over Mount Terror,

6  
00:00:18,051 --> 00:00:21,287  
a live volcano in Antarctica

7  
00:00:21,287 --> 00:00:22,756  
on Ross Island.

8  
00:00:29,062 --> 00:00:32,198  
Mount Terror is a large shield volcano, named in 1841 by Sir James Clark Ross

9  
00:00:32,198 --> 00:00:35,435  
after his ship, the HMS Terror.

10  
00:00:35,535 --> 00:00:37,871  
And if that's not scary enough,

11  
00:00:37,871 --> 00:00:41,341  
just think of the prospect of downloading

12  
00:00:41,341 --> 00:00:43,510  
terror-bytes of data,

13  
00:00:43,510 --> 00:00:45,211

filling your hard drive
