

The image shows a star chart of the Orion constellation against a black background with scattered white stars. The constellation's primary stars are connected by light blue lines. The star Betelgeuse is located at the top left of the main body of the constellation and is distinguished by a white circle with a black dot in the center. The label 'BETELGEUSE' is printed in white capital letters directly below this star. The label 'ORION' is printed in white capital letters in the lower right area of the constellation. The overall shape of the constellation is a large, irregular figure with a long, thin 'belt' extending to the right.

**BETELGEUSE**
