

1
00:00:04,760 --> 00:00:02,300
take a break it's gonna be a while

2
00:00:06,110 --> 00:00:04,770
before they do this for you hurry up and

3
00:00:09,650 --> 00:00:06,120
wait it faster

4
00:00:12,560 --> 00:00:09,660
now sit down it was a nerve-racking test

5
00:00:14,720 --> 00:00:12,570
because of all the failures that we'd

6
00:00:16,490 --> 00:00:14,730
had previously the difficulties we had

7
00:00:19,490 --> 00:00:16,500
had some of the mysterious things that

8
00:00:21,189 --> 00:00:19,500
we'd seen during these tests we really

9
00:00:23,779 --> 00:00:21,199
didn't have anymore

10
00:00:26,450 --> 00:00:23,789
backups in terms of ideas on how to fix

11
00:00:28,640 --> 00:00:26,460
this and it's kind of our last hurrah

12
00:00:38,549 --> 00:00:28,650
here last chance to get it right so

13
00:00:41,889 --> 00:00:40,750

happy no no so I had cornered my either

14

00:00:45,099 --> 00:00:41,899

was April first

15

00:00:47,410 --> 00:00:45,109

sounds like a yeah we we can't just let

16

00:00:49,509 --> 00:00:47,420

you know a good April Fool's days go by

17

00:00:52,270 --> 00:00:49,519

without and doing something so I went to

18

00:00:53,950 --> 00:00:52,280

a locale schema said owl how do you feel

19

00:00:57,359 --> 00:00:53,960

about having some fun at Doug's expense

20

00:01:01,630 --> 00:00:57,369

and so he was up for it and that's when

21

00:01:02,680 --> 00:01:01,640

pat the winter the test director he said

22

00:01:05,020 --> 00:01:02,690

hey well why don't we just tell him that

23

00:01:07,480 --> 00:01:05,030

we didn't get any data and that was

24

00:01:08,800 --> 00:01:07,490

beautiful because the data is everything

25

00:01:10,630 --> 00:01:08,810

on this test if you run the test you

26
00:01:12,249 --> 00:01:10,640
don't get any data you might as well not

27
00:01:15,160 --> 00:01:12,259
have run the test and you can't go back

28
00:01:16,990 --> 00:01:15,170
and redo it because once you unpack the

29
00:01:22,270 --> 00:01:17,000
parachute you can't go back and repack

30
00:01:26,950 --> 00:01:24,970
I heard that I heard the more I punched

31
00:01:28,900 --> 00:01:26,960
the button you know and that's like at

32
00:01:30,700 --> 00:01:28,910
home it was gone I got the

33
00:01:34,090 --> 00:01:30,710
photographer's in on it too to tell Doug

34
00:01:35,310 --> 00:01:34,100
some reason the cameras went out battery

35
00:01:41,640 --> 00:01:35,320
died

36
00:01:46,540 --> 00:01:41,650
no money shot the big picture shots gone

37
00:01:50,020 --> 00:01:46,550
what is up with that what a et-land

38
00:01:54,490 --> 00:01:50,030

during this test or something the D

39

00:01:58,900 --> 00:01:54,500

threes had the lens cap what's up with

40

00:02:01,450 --> 00:01:58,910

this test you know they start they did

41

00:02:03,760 --> 00:02:01,460

the whole chichi thing like I was yeah I

42

00:02:05,440 --> 00:02:03,770

did have no idea so hopefully he

43

00:02:07,749 --> 00:02:05,450

wouldn't really believe that I'd be that

44

00:02:10,660 --> 00:02:07,759

incompetent it's tough leave the lens

45

00:02:14,940 --> 00:02:10,670

caps on but he bought it you know I

46

00:02:14,950 --> 00:02:22,520

mother the capsule

47

00:02:27,089 --> 00:02:25,199

we also don't have any hold on we also

48

00:02:28,770 --> 00:02:27,099

don't have any facilitator so the only

49

00:02:34,740 --> 00:02:28,780

data we have is off those load pins

50

00:02:36,240 --> 00:02:34,750

maybe if we have data posted but right

51
00:02:42,180 --> 00:02:36,250
now this is the test that didn't happen

52
00:02:43,530 --> 00:02:42,190
it's the fans investment ducks they

53
00:02:45,839 --> 00:02:43,540
start saying well maybe we can you know

54
00:02:47,280 --> 00:02:45,849
figure out with parachute load was you

55
00:02:48,630 --> 00:02:47,290
know just by the Windtunnel measurements

56
00:02:50,430 --> 00:02:48,640
how fast the air was going and that's

57
00:02:53,009 --> 00:02:50,440
when Pat happened to be standing there

58
00:02:57,360 --> 00:02:53,019
like I packed we cut wind measurements

59
00:02:59,420 --> 00:02:57,370
it's like ah I think we lost that one

60
00:03:03,190 --> 00:02:59,430
too

61
00:03:07,440 --> 00:03:03,200
that's total pressure

62
00:03:12,640 --> 00:03:07,450
we listen for power surge or something

63
00:03:15,640 --> 00:03:12,650

right at 1 a.m. and Doug was phenomenal

64

00:03:18,460 --> 00:03:15,650

he was you show your true character and

65

00:03:21,210 --> 00:03:18,470

moments of crisis like this and it could

66

00:03:24,790 --> 00:03:21,220

not have been a worse situation

67

00:03:28,510 --> 00:03:24,800

everybody in this booth and the trick

68

00:03:30,880 --> 00:03:28,520

everybody had failed everybody and God

69

00:03:33,460 --> 00:03:30,890

was Doug was totally cool with everybody

70

00:03:34,930 --> 00:03:33,470

he was totally cool you didn't take it

71

00:03:38,410 --> 00:03:34,940

out on anybody he didn't lash out at

72

00:03:41,770 --> 00:03:38,420

anybody and just right the last moment

73

00:03:43,360 --> 00:03:41,780

there when when Anthony from pioneered

74

00:03:46,210 --> 00:03:43,370

told died sorry

75

00:03:49,590 --> 00:03:46,220

put your dad last data source dunno why

76

00:03:52,900 --> 00:03:49,600

but realized it now Anthony you're not

77

00:03:55,690 --> 00:03:52,910

not playing a joke on me here personally

78

00:03:57,610 --> 00:03:55,700

I probably would have lost it I probably

79

00:04:00,520 --> 00:03:57,620

would have flipped out gotten really

80

00:04:04,630 --> 00:04:00,530

angry like right there on the spot but

81

00:04:06,460 --> 00:04:04,640

Doug just just kind of looked up I I

82

00:04:08,170 --> 00:04:06,470

couldn't let him go with the pain any

83

00:04:10,390 --> 00:04:08,180

longer I think I let him go there for a

84

00:04:34,640 --> 00:04:10,400

few seconds and that's one that's the

85

00:04:40,560 --> 00:04:37,680

it was it was he's a really good sport
