SKYJACK

KEEP

1  
00:00:11,720 --> 00:00:09,500  
I mom it's n the Aquarius project

2  
00:00:14,419 --> 00:00:11,730  
manager i'm here at Vandenberg Air Force

3  
00:00:17,120 --> 00:00:14,429  
Base in sunny California this is where

4  
00:00:20,599 --> 00:00:17,130  
we launched Aquarius from the place

5  
00:00:23,509 --> 00:00:20,609  
Space Launch Complex to or slick to as

6  
00:00:26,120 --> 00:00:23,519  
we call it over the few days we have put

7  
00:00:29,570 --> 00:00:26,130  
a bag over the spacecraft so it remains

8  
00:00:32,569 --> 00:00:29,580  
clean and then we put the entire

9  
00:00:35,360 --> 00:00:32,579  
spacecraft into a canister or a can as

10  
00:00:38,569 --> 00:00:35,370  
we call it and it's a very big can it's

11  
00:00:42,470 --> 00:00:38,579  
about 30 feet tall we now put it on a

12  
00:00:45,940 --> 00:00:42,480  
truck and started moving up north to the

13  
00:00:49,310 --> 00:00:45,950

slick do facility this 20-mile journey

14

00:00:51,350 --> 00:00:49,320

takes us five hours pulling in a very

15

00:00:54,650 --> 00:00:51,360

slow space in the middle of the night

16

00:00:57,529 --> 00:00:54,660

and engineers have been working day and

17

00:01:00,529 --> 00:00:57,539

night to make this possible we appear

18

00:01:03,439 --> 00:01:00,539

here at slick to space launch complex

19

00:01:06,620 --> 00:01:03,449

too early in the morning at the base of

20

00:01:09,200 --> 00:01:06,630

the tower the canister is slowly lifted

21

00:01:12,560 --> 00:01:09,210

up to the top of the tower it takes

22

00:01:16,249 --> 00:01:12,570

about 45 minutes to take the canister up

23

00:01:19,640 --> 00:01:16,259

and put it into the right place once the

24

00:01:21,830 --> 00:01:19,650

canister is on topping we bolt it onto

25

00:01:24,410 --> 00:01:21,840

the top of the rocket where it's going

26

00:01:27,320 --> 00:01:24,420

to sit until we again test it to make

27

00:01:29,539 --> 00:01:27,330

sure everything is working right this is

28

00:01:31,910 --> 00:01:29,549

all its sin bringing you an update from
