

1
00:00:00,000 --> 00:00:03,000
Silent.

2
00:00:03,000 --> 00:00:08,000
Maria Zuber: I'm Maria Zuber, Principal Investigator of NASA's GRAIL mission.

3
00:00:08,000 --> 00:00:13,000
GRAIL is the first planetary robotic mission that includes an imaging experiment

4
00:00:13,000 --> 00:00:18,000
that's devoted entirely to education and outreach, called the MoonKAM system.

5
00:00:18,000 --> 00:00:23,000
This video clip was made by Ebb as it flew above the surface of the moon that we don't see from Earth,

6
00:00:23,000 --> 00:00:29,000
from the north pole towards the south pole. The far side of the moon is extremely rugged.

7
00:00:29,000 --> 00:00:34,000
The surface also contains many impact craters, which are preserved features from asteroids

8
00:00:34,000 --> 00:00:37,000
that hit the moon's surface after it formed.
