

Will Spurgeon
Clark Magnet High School

1
00:00:00,290 --> 00:00:23,200
kick it

2
00:00:27,700 --> 00:00:26,079
this robotics basketball is more mental

3
00:00:29,499 --> 00:00:27,710
in that you have to plan ahead you have

4
00:00:35,560 --> 00:00:29,509
to design the robot it's more innovative

5
00:00:36,970 --> 00:00:35,570
rather than reactionary you know every

6
00:00:38,920 --> 00:00:36,980
years a challenge we always have to come

7
00:00:41,110 --> 00:00:38,930
up with a different design this year we

8
00:00:43,090 --> 00:00:41,120
spend about a week just designing we get

9
00:00:45,850 --> 00:00:43,100
a lot of ideas but there is also a lot

10
00:00:47,710 --> 00:00:45,860
of spirited debate and I guess

11
00:00:49,000 --> 00:00:47,720
eventually we either vote or just come

12
00:00:52,500 --> 00:00:49,010
to a consensus and that's how we make

13
00:00:56,520 --> 00:00:54,509

I learned a lot of technical skills like

14

00:00:57,630 --> 00:00:56,530

how to program in C++ basically I

15

00:00:59,310 --> 00:00:57,640

already one is going to near into

16

00:01:01,020 --> 00:00:59,320

engineering so I just learned so much

17

00:01:02,670 --> 00:01:01,030

about robotics and so many men of a

18

00:01:04,229 --> 00:01:02,680

mechanic's about it I learned how to

19

00:01:06,600 --> 00:01:04,239

communicate i learned how to build a

20

00:01:08,429 --> 00:01:06,610

robot learn how to problem-solve and get

21

00:01:11,700 --> 00:01:08,439

things done really quickly everything I
