

1
00:00:17,189 --> 00:00:15,270
so here we are onboard the kahana

2
00:00:18,550 --> 00:00:17,199
this morning looking at the the vehicle

3
00:00:21,029 --> 00:00:18,560
that we've managed to recover and pull

4
00:00:23,029 --> 00:00:21,039
out of the water all went perfectly we

5
00:00:24,710 --> 00:00:23,039
recovered everything except for the

6
00:00:26,150 --> 00:00:24,720
smoke from the rockets everything came

7
00:00:27,029 --> 00:00:26,160
back and so we're really thrilled with

8
00:00:28,390 --> 00:00:27,039
that

9
00:00:30,790 --> 00:00:28,400
it doesn't look like it's in very good

10
00:00:33,030 --> 00:00:30,800
shape right now but

11
00:00:34,229 --> 00:00:33,040
it's perfectly fine tomorrow we're going

12
00:00:36,389 --> 00:00:34,239
to start taking it apart we're going to

13
00:00:38,229 --> 00:00:36,399

take the side off take the motor out

14

00:00:39,910 --> 00:00:38,239

take out the cameras be able to extract

15

00:00:41,430 --> 00:00:39,920

the data from the camera recorders which

16

00:00:42,630 --> 00:00:41,440

is uh which is also on the vehicle i

17

00:00:43,990 --> 00:00:42,640

really want to thank everybody who was

18

00:00:46,229 --> 00:00:44,000

involved in this it was a fantastic

19

00:00:48,709 --> 00:00:46,239

effort from the boat crews the the navy

20

00:00:50,630 --> 00:00:48,719

explosive ordnance disposal guys uh the

21

00:00:52,549 --> 00:00:50,640

the assistance from jpl all of them did

22

00:00:54,630 --> 00:00:52,559

a fantastic job spotting this stuff

23

00:00:56,150 --> 00:00:54,640

getting it out of the water um finding

24

00:00:57,510 --> 00:00:56,160

all of the pieces and making sure that

25

00:00:59,990 --> 00:00:57,520

this didn't sink making sure we got the

26

00:01:01,430 --> 00:01:00,000

parachute before it sank fantastic job
