

Auroras

1  
00:00:00,633 --> 00:00:02,235  
Auroras Over Saturn

2  
00:00:04,336 --> 00:00:07,974  
These ghostly curtains of light  
are Saturn's auroras,

3  
00:00:08,007 --> 00:00:10,943  
seen from NASA's  
Cassini spacecraft.

4  
00:00:12,411 --> 00:00:15,982  
Cassini saw this  
natural light show

5  
00:00:16,015 --> 00:00:19,252  
while gazing toward the south  
pole on Saturn's night side.

6  
00:00:20,820 --> 00:00:24,857  
Stars pass behind the planet.

7  
00:00:24,890 --> 00:00:28,327  
Some stars appear to  
change direction

8  
00:00:28,360 --> 00:00:31,064  
as their light is bent  
by Saturn's atmosphere.

9  
00:00:32,232 --> 00:00:34,167  
Cassini took the images  
in this looped movie sequence

10  
00:00:34,200 --> 00:00:38,671  
over about an hour  
on July 20, 2017.

11  
00:00:39,405 --> 00:00:40,973
