

A vibrant space scene featuring a star cluster. The cluster is a dense group of stars, with a prominent bright white star at its center. The stars are surrounded by a thick, glowing nebula of red and orange dust and gas. To the left, a large, billowing cloud of green and blue gas is visible. The background is a dark, star-filled field of distant stars. A white oval highlights the star cluster and its immediate surroundings.

STAR CLUSTER

Massive stars illuminate this dusty region.
