

1
00:00:11,830 --> 00:00:04,550
data products just came in

2
00:00:16,630 --> 00:00:14,390
that's all from downlink so it's on to

3
00:00:18,870 --> 00:00:16,640
the actual engineers to look through

4
00:00:20,230 --> 00:00:18,880
their data and tell us how great the

5
00:00:22,870 --> 00:00:20,240
flight was

6
00:00:24,150 --> 00:00:22,880
according to gnc aviars everything

7
00:00:27,349 --> 00:00:24,160
executed nominally

8
00:00:28,310 --> 00:00:27,359
but it looked to have maneuvered exactly

9
00:00:33,440 --> 00:00:28,320
as

10
00:00:42,830 --> 00:00:35,160
[Applause]
