

1
00:00:05,870 --> 00:00:03,350
applica indicates you deploy

2
00:00:07,610 --> 00:00:05,880
the navigation has confirmed that the

3
00:00:10,910 --> 00:00:07,620
parachute has deployed and we are seeing

4
00:00:13,370 --> 00:00:10,920
significant deceleration he Shields up

5
00:00:14,870 --> 00:00:13,380
perseverance has slowed to subsonic

6
00:00:16,670 --> 00:00:14,880
speeds and the heat shield has been

7
00:00:19,250 --> 00:00:16,680
separated radar lock on the ground

8
00:00:22,429 --> 00:00:19,260
current velocity is about 100 meters per

9
00:00:23,929 --> 00:00:22,439
second we're coming up on the

10
00:00:26,750 --> 00:00:23,939
initialization of terrain relative

11
00:00:29,509 --> 00:00:26,760
navigation and subsequently the priming

12
00:00:31,669 --> 00:00:29,519
of the landing engines we have timing of

13
00:00:33,830 --> 00:00:31,679

the landing engines we have confirmation

14

00:00:35,630 --> 00:00:33,840

that the back shell has separated we

15

00:00:38,270 --> 00:00:35,640

have completed our terrain relative

16

00:00:47,510 --> 00:00:41,690

yeah skycam maneuver has started

17

00:00:50,930 --> 00:00:49,910

we're getting signals from mro Tango

18

00:00:53,869 --> 00:00:50,940

Delta

19

00:00:56,990 --> 00:00:53,879

touch on confirmed perseverance safely
