

1  
00:00:14,549 --> 00:00:13,030  
it takes risks to learn and get to new

2  
00:00:17,189 --> 00:00:14,559  
research and new heights and like the

3  
00:00:19,429 --> 00:00:17,199  
space program of course and research and

4  
00:00:21,429 --> 00:00:19,439  
stuff it just like unleashes unlimitable

5  
00:00:25,750 --> 00:00:21,439  
bounds like of what we can research what

6  
00:00:29,589 --> 00:00:27,830  
to see what else is out there because

7  
00:00:31,109 --> 00:00:29,599  
you can be in one certain area but then

8  
00:00:33,990 --> 00:00:31,119  
that's all you know it's always good to

9  
00:00:36,470 --> 00:00:34,000  
see what else is around you

10  
00:00:38,470 --> 00:00:36,480  
sts-118 is going to be a really exciting

11  
00:00:40,389 --> 00:00:38,480  
mission we're going to be taking up a

12  
00:00:41,750 --> 00:00:40,399  
section of the space station

13  
00:00:43,990 --> 00:00:41,760

in addition to that we're also going to

14

00:00:45,830 --> 00:00:44,000

be doing a number of space walks but

15

00:00:48,069 --> 00:00:45,840

morgan will be flying with us as a

16

00:00:50,150 --> 00:00:48,079

mission specialist educator astronaut

17

00:00:52,389 --> 00:00:50,160

trying to captivate the imagination of

18

00:01:08,469 --> 00:00:52,399

the youth of america looking at that

19

00:01:11,670 --> 00:01:09,830

it's been delightful working with this

20

00:01:13,030 --> 00:01:11,680

team the crew has been fantastic i

21

00:01:14,310 --> 00:01:13,040

couldn't have been happy to couldn't

22

00:01:16,310 --> 00:01:14,320

have picked a better crew if i had to

23

00:01:18,550 --> 00:01:16,320

hand select from the astronaut corps

24

00:01:20,950 --> 00:01:18,560

the whole team that's been working on it

25

00:01:22,630 --> 00:01:20,960

the 13a that one mission has been

26

00:01:24,630 --> 00:01:22,640

fantastic to work with

27

00:01:26,390 --> 00:01:24,640

we just have a lot of fun together and

28

00:01:27,830 --> 00:01:26,400

the people that you spend that time with

29

00:01:30,469 --> 00:01:27,840

the people you work with the people who

30

00:01:32,789 --> 00:01:30,479

you depend on are really what make the

31

00:01:34,149 --> 00:01:32,799

mission most memorable i think and i

32

00:01:36,149 --> 00:01:34,159

think we're going to have a lot of great

33

00:01:37,830 --> 00:01:36,159

memories we've already created a lot

34

00:01:41,990 --> 00:01:37,840

during training we have a good time

35

00:01:45,429 --> 00:01:42,000

these flights are very very complicated

36

00:01:48,950 --> 00:01:45,439

and very full of content and

37

00:01:51,270 --> 00:01:48,960

everyone has to be a fully functioning

38

00:01:53,670 --> 00:01:51,280

crew member i have you know very high

39

00:01:55,190 --> 00:01:53,680

expectations of of all of us to to get

40

00:01:56,950 --> 00:01:55,200

this job done

41

00:01:59,190 --> 00:01:56,960

it's very challenging you get to work

42

00:02:00,230 --> 00:01:59,200

with very dedicated people not only the

43

00:02:02,389 --> 00:02:00,240

people

44

00:02:04,230 --> 00:02:02,399

that have the privilege of

45

00:02:06,630 --> 00:02:04,240

flying in space but all the people that

46

00:02:08,710 --> 00:02:06,640

train us and the engineers that work on

47

00:02:10,469 --> 00:02:08,720

the program and just everyone involved

48

00:02:12,710 --> 00:02:10,479

just has such a

49

00:02:14,390 --> 00:02:12,720

love for what they do and it's kind of

50

00:02:16,229 --> 00:02:14,400

contagious and
