

1
00:00:10,080 --> 00:00:20,070
congratulations

2
00:00:26,550 --> 00:00:23,269
welcome aboard to uh chris from england

3
00:00:28,390 --> 00:00:26,560
who's 13 years old and he's asking me is

4
00:00:30,070 --> 00:00:28,400
it easier to work in space than it is on

5
00:00:31,269 --> 00:00:30,080
the ground

6
00:00:34,069 --> 00:00:31,279
and you know

7
00:00:35,430 --> 00:00:34,079
um at first coming up here you kind of

8
00:00:37,270 --> 00:00:35,440
have to learn how to do everything you

9
00:00:38,150 --> 00:00:37,280
already knew how to do again a different

10
00:00:39,510 --> 00:00:38,160
way

11
00:00:40,790 --> 00:00:39,520
and so

12
00:00:42,630 --> 00:00:40,800
that takes a little bit of doing it and

13
00:00:44,790 --> 00:00:42,640

once you get that once you get to that

14

00:00:46,869 --> 00:00:44,800

point um

15

00:00:48,869 --> 00:00:46,879

you know some things are much easier and

16

00:00:50,470 --> 00:00:48,879

other things are harder you know every

17

00:00:52,389 --> 00:00:50,480

once in a while i'm trying to do

18

00:00:54,310 --> 00:00:52,399

something and i i just wish i could

19

00:00:57,029 --> 00:00:54,320

stand up and

20

00:00:58,950 --> 00:00:57,039

hold on to something and you know and

21

00:01:00,069 --> 00:00:58,960

and keep keep something still without

22

00:01:01,590 --> 00:01:00,079

having to

23

00:01:04,149 --> 00:01:01,600

um

24

00:01:06,149 --> 00:01:04,159

prevent my own body from from turning or

25

00:01:07,109 --> 00:01:06,159

moving away from what i'm doing

26

00:01:09,030 --> 00:01:07,119

um

27

00:01:11,190 --> 00:01:09,040

and you know if you have a lot of tools

28

00:01:13,190 --> 00:01:11,200

and parts you're working with

29

00:01:15,190 --> 00:01:13,200

you know the advantage up here is that

30

00:01:17,350 --> 00:01:15,200

you can have them floating around you

31

00:01:18,870 --> 00:01:17,360

and let go of them temporarily but the

32

00:01:20,870 --> 00:01:18,880

disadvantage is they can disappear

33

00:01:23,830 --> 00:01:20,880

really fast things seem to want to

34

00:01:25,990 --> 00:01:23,840

escape from you up here and they they do

35

00:01:27,910 --> 00:01:26,000

escape very quickly and then you can't

36

00:01:29,590 --> 00:01:27,920

find them

37

00:01:31,190 --> 00:01:29,600

it is easier to do certain things

38

00:01:36,390 --> 00:01:31,200

because you can you can get in different

39

00:01:40,230 --> 00:01:38,230

you can take advantage of the

40

00:01:41,990 --> 00:01:40,240

three-dimensional

41

00:01:43,270 --> 00:01:42,000

environment and working at different

42

00:01:44,550 --> 00:01:43,280

orientations

43

00:01:46,550 --> 00:01:44,560

and

44

00:01:48,710 --> 00:01:46,560

it's a lot of fun

45

00:01:50,630 --> 00:01:48,720

working in this environment

46

00:01:51,590 --> 00:01:50,640

but my commander i think said it best

47

00:01:53,910 --> 00:01:51,600

you know

48

00:01:55,429 --> 00:01:53,920

sergey uh volkov

49

00:01:57,590 --> 00:01:55,439

and i were talking about this he was

50

00:01:59,830 --> 00:01:57,600

saying you know and he said this in

51

00:02:02,149 --> 00:01:59,840

russia and he said you know

52

00:02:03,190 --> 00:02:02,159

working in zero gravity it's really

53

00:02:05,109 --> 00:02:03,200

great

54

00:02:07,510 --> 00:02:05,119

it's really helpful

55

00:02:10,070 --> 00:02:07,520

and he said but also you know working in

56

00:02:12,070 --> 00:02:10,080

zero gravity it's really difficult it's

57

00:02:14,150 --> 00:02:12,080

much harder so

58

00:02:15,990 --> 00:02:14,160

it's just depends what you're doing in

59

00:02:17,670 --> 00:02:16,000

any case it's a lot of fun and it's
