

1
00:00:10,080 --> 00:00:22,150
congratulations

2
00:00:26,310 --> 00:00:24,790
owen from san francisco says they say

3
00:00:28,310 --> 00:00:26,320
that the sense of smell creates the

4
00:00:30,630 --> 00:00:28,320
strongest memories for a person what

5
00:00:34,150 --> 00:00:30,640
does the iss smell like and what scent

6
00:00:38,630 --> 00:00:36,069
you know the iss we've got a really good

7
00:00:40,470 --> 00:00:38,640
filtering system this air flowing

8
00:00:42,630 --> 00:00:40,480
in fact everything you hear when you're

9
00:00:44,950 --> 00:00:42,640
up here is fans going and air

10
00:00:46,389 --> 00:00:44,960
circulating so we're constantly getting

11
00:00:47,990 --> 00:00:46,399
a fresh supply of oxygen we're

12
00:00:49,270 --> 00:00:48,000
constantly getting the carbon dioxide

13
00:00:50,389 --> 00:00:49,280

scrubbed and all the other things

14

00:00:51,510 --> 00:00:50,399

filtered out

15

00:00:53,350 --> 00:00:51,520

so um

16

00:00:55,910 --> 00:00:53,360

it really doesn't smell although when we

17

00:00:57,750 --> 00:00:55,920

first docked uh with the shuttle

18

00:00:59,750 --> 00:00:57,760

there was a noticeable smell but you get

19

00:01:02,389 --> 00:00:59,760

it you get accustomed to it very quickly

20

00:01:03,830 --> 00:01:02,399

so i can't tell any anything anymore

21

00:01:06,390 --> 00:01:03,840

there's one smell up here that's really

22

00:01:09,190 --> 00:01:06,400

unique though and that is the smell

23

00:01:12,789 --> 00:01:09,200

we just call the smell of space but

24

00:01:14,390 --> 00:01:12,799

uh we experience it when

25

00:01:15,830 --> 00:01:14,400

i haven't had a chance to do a spacewalk

26

00:01:18,149 --> 00:01:15,840

yet i'm still waiting and hoping for

27

00:01:19,429 --> 00:01:18,159

that but when other guys did and they

28

00:01:23,030 --> 00:01:19,439

came back in

29

00:01:24,550 --> 00:01:23,040

um after we repressurized and opened up

30

00:01:26,710 --> 00:01:24,560

the volume for them to come back into

31

00:01:30,230 --> 00:01:26,720

the station there's this really

32

00:01:33,510 --> 00:01:30,240

really strong metallic smell

33

00:01:35,749 --> 00:01:33,520

and i don't know exactly what it is

34

00:01:38,469 --> 00:01:35,759

something to do with

35

00:01:40,870 --> 00:01:38,479

maybe atomic oxygen interacting with the

36

00:01:43,350 --> 00:01:40,880

suit materials or we're not exactly sure

37

00:01:45,270 --> 00:01:43,360

what it is it's very distinct smell and

38

00:01:46,310 --> 00:01:45,280

it's just it's the smell of space it's

39

00:01:47,990 --> 00:01:46,320

really cool

40

00:01:49,590 --> 00:01:48,000

but that's the only smell that's really

41

00:01:51,670 --> 00:01:49,600

strong other than i've noticed up here

42

00:01:52,630 --> 00:01:51,680

other than of course our food you know

43

00:01:54,550 --> 00:01:52,640

has

44

00:01:56,789 --> 00:01:54,560

depending what package you open you know

45

00:02:00,230 --> 00:01:56,799

has a appetizing hopefully

46

00:02:04,069 --> 00:02:00,240

diabetically appetizing smell um

47

00:02:05,270 --> 00:02:04,079

and uh what do i miss on earth i think

48

00:02:06,950 --> 00:02:05,280

i haven't thought of it in terms of

49

00:02:09,350 --> 00:02:06,960

smells but you know i'm sure it's going

50

00:02:12,150 --> 00:02:09,360

to be a big deal when i can smell fresh

51

00:02:13,270 --> 00:02:12,160

air outside again and from the smell of

52

00:02:15,350 --> 00:02:13,280

uh

53

00:02:17,750 --> 00:02:15,360

you know a pine forest and that kind of
