

1
00:00:04,950 --> 00:00:02,869
hi we are in grade five and six at town

2
00:00:07,430 --> 00:00:04,960
road school new zealand we're learning

3
00:00:10,870 --> 00:00:07,440
about sounds of space we learned that

4
00:00:13,430 --> 00:00:10,880
space is not a noisy place as we hear it

5
00:00:22,870 --> 00:00:13,440
to be on space movies can you describe

6
00:00:26,790 --> 00:00:24,630
hey that's a great question

7
00:00:27,990 --> 00:00:26,800
you know interestingly enough we're up

8
00:00:30,230 --> 00:00:28,000
in space

9
00:00:32,790 --> 00:00:30,240
it's really very similar to living on

10
00:00:33,830 --> 00:00:32,800
the earth as far as the air goes we get

11
00:00:36,229 --> 00:00:33,840
to wear

12
00:00:37,510 --> 00:00:36,239
regular clothes just like you do

13
00:00:39,910 --> 00:00:37,520

and we live

14

00:00:41,510 --> 00:00:39,920

in very comfortable air

15

00:00:43,910 --> 00:00:41,520

so because of that

16

00:00:46,310 --> 00:00:43,920

sound travels normally now when you're

17

00:00:47,510 --> 00:00:46,320

outside into space if you're outside

18

00:00:49,830 --> 00:00:47,520

from here

19

00:00:51,910 --> 00:00:49,840

then we have special spacesuits with

20

00:00:54,150 --> 00:00:51,920

special communications and radios that

21

00:00:56,229 --> 00:00:54,160

allow us to talk to each other because

22

00:00:58,790 --> 00:00:56,239

if you did have what we call the vacuum

23

00:01:00,790 --> 00:00:58,800

of space without air then you don't have

24

00:01:02,790 --> 00:01:00,800

any way of having sound travel so you
