

1
00:00:04,789 --> 00:00:02,950
hi my name is patrick bullock i'm from

2
00:00:06,630 --> 00:00:04,799
olympia washington and i would like to

3
00:00:08,629 --> 00:00:06,640
ask you how much different is it

4
00:00:10,390 --> 00:00:08,639
sleeping in space than sleeping on earth

5
00:00:12,709 --> 00:00:10,400
does it feel any different

6
00:00:16,870 --> 00:00:12,719
what kind of apparatus keeps you from

7
00:00:19,429 --> 00:00:16,880
flying off and bonking your head on some

8
00:00:24,150 --> 00:00:19,439
part of the ship or someone else

9
00:00:27,750 --> 00:00:25,670
hey patrick that's a great question

10
00:00:29,029 --> 00:00:27,760
actually the way we sleep in space is

11
00:00:30,390 --> 00:00:29,039
kind of like the way you sleep at home

12
00:00:32,389 --> 00:00:30,400
except the great thing about space is

13
00:00:35,350 --> 00:00:32,399

you can sleep upside down right side up

14

00:00:36,630 --> 00:00:35,360

you know left you can sleep diagonally

15

00:00:38,229 --> 00:00:36,640

it doesn't really matter anywhere you

16

00:00:40,229 --> 00:00:38,239

want to put your bag is where you'll be

17

00:00:42,150 --> 00:00:40,239

sleeping we do have hooks on our

18

00:00:45,990 --> 00:00:42,160

sleeping bags that keep us restrained in

19

00:00:49,670 --> 00:00:47,910

and that that particular those

20

00:00:51,910 --> 00:00:49,680

particular bags allow us to kind of keep

21

00:00:53,670 --> 00:00:51,920

us stable but you really don't need to

22

00:00:55,189 --> 00:00:53,680

lay on anything like a mattress you

23

00:00:56,310 --> 00:00:55,199

don't need a pillow

24

00:00:57,350 --> 00:00:56,320

it's nice to have something that goes

25

00:00:59,750 --> 00:00:57,360

over your eyes because you got to
