

1
00:00:02,000 --> 00:00:07,120

\h So these are the same gloves I tried in January, I think it was.

2
00:00:07,120 --> 00:00:12,930

\h When we go outside to do space walks, or what we call extra-vehicular activity or EVA,

3
00:00:12,930 --> 00:00:16,070

\h it's very important that the suit fits us very well,

4
00:00:16,070 --> 00:00:19,950

\h and the most important part of the suit are the gloves.

5
00:00:19,950 --> 00:00:24,060

\h So we use this facility here to do a fit-check of the gloves.

6
00:00:24,060 --> 00:00:29,360

\h We pull a vacuum inside the chamber and that simulates the outside activity,

7
00:00:29,360 --> 00:00:31,940

\h or the vacuum of space, for the gloves,
