

1
00:00:02,230 --> 00:00:05,350

\h Just like if you're driving down the road and your engine overheats

2
00:00:05,350 --> 00:00:11,590

\h and you need to stop and shut down the engine to prevent the engine from being severely damaged,

3
00:00:11,590 --> 00:00:16,960

\h we have similar kinds of situations that could possibly happen on-board the space station.

4
00:00:16,960 --> 00:00:20,930

\h Today we were training for one of those cases where we've lost our ability

5
00:00:20,930 --> 00:00:26,350

\h to cool the avionics and the critical systems onboard the space station,

6
00:00:26,350 --> 00:00:29,890

\h and then we, as a crew, need to respond to that emergency,
