

1
00:00:14,036 --> 00:00:16,996
I have not met one person who's
not passionate about what they do.

2
00:00:21,096 --> 00:00:25,500
I have to say, it makes me very
proud to be part of this program.

3
00:00:28,336 --> 00:00:31,216
I was just lucky enough to
land a job with NASA and low

4
00:00:31,216 --> 00:00:25,790
and behold it was probably the
best thing that happened to me.

5
00:00:40,500 --> 00:00:45,750
All this started about 2 1/2 years
ago with storyboards and cartoons.

6
00:00:50,076 --> 00:00:52,636
It's pretty cutting edge technology.

7
00:00:52,636 --> 00:00:55,640
It's amazing to think that
we can bring things here

8
00:00:55,646 --> 00:00:59,666
and test hardware that's going to go to space.

9
00:00:59,666 --> 00:01:00,616
It's a pretty big deal.

10
00:01:10,356 --> 00:01:14,086
It's one of those things that it's great to
get up in the morning and come to work for NASA

11
00:01:14,100 --> 00:01:16,286
and I never complain no matter what we're doing.

12
00:01:30,500 --> 00:01:34,306
To me, I go here and sometimes you get lost
and you lose perspective, and it's your job

13
00:01:34,306 --> 00:01:37,940
and you do it every day, but when you
tell somebody outside what you do,

14
00:01:37,946 --> 00:01:40,256
a lot of the times they don't even believe you.

15
00:01:47,256 --> 00:01:49,576
The work that we're doing out here is going
to inspire the next generation of engineers,

16
00:01:49,576 --> 00:01:52,256
astronauts, and other scientists.

17
00:01:52,256 --> 00:01:54,726
Well, this is one thing I
really joined NASA to do.

18
00:01:54,726 --> 00:02:00,146
I look at the exploration and
expansion as the reason we have NASA.

19
00:02:00,146 --> 00:02:05,960
I believe their technology and the
information we get from these kinds
