

1  
00:00:00,956 --> 00:00:06,656  
Expedition 26 Commander Scott Kelly:  
Greetings from the International Space Station

2  
00:00:06,656 --> 00:00:08,496  
and the crew of ISS Expedition 26.

3  
00:00:08,636 --> 00:00:13,636  
Currently, we're orbiting the Earth  
at 17,500 miles an hour over 200 miles

4  
00:00:13,636 --> 00:00:18,566  
above our beautiful planet that we should  
all be thankful to have as our home.

5  
00:00:19,966 --> 00:00:26,106  
I'd like to wish everyone on the planet Earth  
a happy holidays and a very merry Christmas.

6  
00:00:26,826 --> 00:00:31,866  
Flight Engineer Catherine Coleman: The  
holidays are a time that we treasure being

7  
00:00:31,866 --> 00:00:35,366  
with our family and our friends,  
and we think about what we have

8  
00:00:35,456 --> 00:00:38,186  
and how much more we have than others do.

9  
00:00:38,866 --> 00:00:42,576  
Times are hard all over the world, but  
this is a time when we can all think

10  
00:00:42,576 --> 00:00:45,316  
about being together and treasuring our planet.

11  
00:00:45,656 --> 00:00:47,396  
And we have a pretty nice view of it up here.

12

00:00:49,206 --> 00:00:55,776

Flight Engineer Paolo Nespoli: From  
up here we see one world, one Earth,
