

1  
00:00:06,710 --> 00:00:03,110  
and talking to

2  
00:00:09,030 --> 00:00:06,720  
her neurosurgeon and her trauma surgeon

3  
00:00:10,790 --> 00:00:09,040  
about her prognosis

4  
00:00:13,509 --> 00:00:10,800  
and

5  
00:00:15,270 --> 00:00:13,519  
at that time my thought was that i'd

6  
00:00:17,990 --> 00:00:15,280  
very likely

7  
00:00:21,189 --> 00:00:18,000  
be sitting in that same seat

8  
00:00:24,870 --> 00:00:21,199  
maybe two four six months later

9  
00:00:27,029 --> 00:00:24,880  
in that icu by her bedside

10  
00:00:32,229 --> 00:00:27,039  
the doctors thought that that was a

11  
00:00:35,590 --> 00:00:34,229  
as she progressed

12  
00:00:38,389 --> 00:00:35,600  
day to day

13  
00:00:40,950 --> 00:00:38,399

it became started to become evident that

14

00:00:44,150 --> 00:00:40,960

she was not going to be in icu in

15

00:00:46,950 --> 00:00:44,160

you know maybe not even two weeks

16

00:00:49,029 --> 00:00:46,960

i was told by all of her physicians that

17

00:00:51,110 --> 00:00:49,039

she was going to have a setback that at

18

00:00:52,950 --> 00:00:51,120

one point in the first 72 hours she was

19

00:00:55,029 --> 00:00:52,960

going to get worse and then again in the

20

00:00:55,990 --> 00:00:55,039

first week she was going to get worse

21

00:00:58,229 --> 00:00:56,000

and

22

00:01:00,069 --> 00:00:58,239

she would continue to have days where

23

00:01:01,270 --> 00:01:00,079

she just had setbacks and this was going

24

00:01:03,830 --> 00:01:01,280

to be

25

00:01:04,869 --> 00:01:03,840

a process much longer than i expected

26

00:01:07,109 --> 00:01:04,879

um

27

00:01:09,190 --> 00:01:07,119

since then four weeks ago nearly four

28

00:01:13,270 --> 00:01:09,200

weeks ago she's never gotten worse

29

00:01:15,990 --> 00:01:13,280

uh as we got to about the one week

30

00:01:17,670 --> 00:01:16,000

stay in the icu we started to evaluate

31

00:01:19,670 --> 00:01:17,680

where are we going to move her to for a

32

00:01:21,670 --> 00:01:19,680

rehab facility

33

00:01:23,910 --> 00:01:21,680

we've got we got received a lot of

34

00:01:24,950 --> 00:01:23,920

inputs from a lot of great places in the

35

00:01:26,710 --> 00:01:24,960

country

36

00:01:28,710 --> 00:01:26,720

it became

37

00:01:30,230 --> 00:01:28,720

quickly evident that one of the best

38

00:01:31,910 --> 00:01:30,240

places

39

00:01:34,870 --> 00:01:31,920

in the country for this type of injury

40

00:01:36,390 --> 00:01:34,880

was here in houston at tier memorial

41

00:01:40,469 --> 00:01:36,400

hermann

42

00:01:43,109 --> 00:01:40,479

so about two weeks ago i started

43

00:01:45,590 --> 00:01:43,119

going through the process myself

44

00:01:47,350 --> 00:01:45,600

of what would i need

45

00:01:49,109 --> 00:01:47,360

in order to get back

46

00:01:52,830 --> 00:01:49,119

with my crew to continue training for

47

00:01:56,469 --> 00:01:54,550

and

48

00:01:58,789 --> 00:01:56,479

you know this has been a a learning

49

00:02:00,630 --> 00:01:58,799

process in brain injury for me and what

50

00:02:03,270 --> 00:02:00,640

rehab is like

51

00:02:05,429 --> 00:02:03,280

and after speaking to

52

00:02:06,789 --> 00:02:05,439

her rehab doctors and the neurosurgeons

53

00:02:08,229 --> 00:02:06,799

here

54

00:02:09,830 --> 00:02:08,239

it also became evident that she was

55

00:02:10,949 --> 00:02:09,840

going to be very busy

56

00:02:13,350 --> 00:02:10,959

um

57

00:02:15,670 --> 00:02:13,360

her days are filled

58

00:02:18,710 --> 00:02:15,680

from the time she gets up at 8 o'clock

59

00:02:20,790 --> 00:02:18,720

until after 6 p.m with

60

00:02:23,350 --> 00:02:20,800

six hours of speech occupational

61

00:02:24,229 --> 00:02:23,360

physical therapy so she's got very busy

62

00:02:26,949 --> 00:02:24,239

days

63

00:02:29,350 --> 00:02:26,959

and meals in between

64

00:02:33,670 --> 00:02:29,360

and i started to think

65

00:02:34,949 --> 00:02:33,680

about sts-134 about the mission my crew

66

00:02:35,990 --> 00:02:34,959

the fact that i've been training for it

67

00:02:38,390 --> 00:02:36,000

for

68

00:02:40,309 --> 00:02:38,400

nearly a year and a half

69

00:02:42,630 --> 00:02:40,319

and considering

70

00:02:45,270 --> 00:02:42,640

a bunch of other factors including how

71

00:02:47,509 --> 00:02:45,280

what gabrielle would want me to do

72

00:02:49,350 --> 00:02:47,519

and what her parents and her family and

73

00:02:51,589 --> 00:02:49,360

my family would like

74

00:02:54,070 --> 00:02:51,599

you know i ultimately made the decision

75

00:02:56,630 --> 00:02:54,080

that i would like to return

76

00:02:58,630 --> 00:02:56,640

and and command

77

00:03:00,470 --> 00:02:58,640

sts-134

78

00:03:02,229 --> 00:03:00,480

so at that point i went to

79

00:03:04,070 --> 00:03:02,239

my boss peggy

80

00:03:06,710 --> 00:03:04,080

whitson peggy whitson the chief of the

81

00:03:08,550 --> 00:03:06,720

astronaut office well mark obviously had

82

00:03:10,470 --> 00:03:08,560

to make the first part of this decision

83

00:03:13,030 --> 00:03:10,480

because we weren't going to ask him to

84

00:03:14,550 --> 00:03:13,040

command 134 unless he felt comfortable

85

00:03:16,470 --> 00:03:14,560

and ready to do that

86

00:03:19,110 --> 00:03:16,480

and in addition to feeling comfortable

87

00:03:20,949 --> 00:03:19,120

he has an incredible support group which

88

00:03:23,750 --> 00:03:20,959

made us more comfortable with the fact

89

00:03:25,110 --> 00:03:23,760

that he had folks to help him through

90

00:03:28,470 --> 00:03:25,120

this process

91

00:03:30,710 --> 00:03:28,480

and that it would make it a doable thing

92

00:03:32,869 --> 00:03:30,720

for him to perform the mission

93

00:03:34,710 --> 00:03:32,879

from from my perspective obviously i

94

00:03:36,630 --> 00:03:34,720

have to choose a crew

95

00:03:38,309 --> 00:03:36,640

a crew that will be able to support the

96

00:03:40,309 --> 00:03:38,319

mission and i want to be able to do that

97

00:03:41,509 --> 00:03:40,319

with the least amount of risk overall

98

00:03:43,990 --> 00:03:41,519

for the mission

99

00:03:45,190 --> 00:03:44,000

and to optimize for success and

100

00:03:47,030 --> 00:03:45,200

obviously

101  
00:03:49,750 --> 00:03:47,040  
although cj has been training as a

102  
00:03:51,830 --> 00:03:49,760  
backup the last few weeks

103  
00:03:53,429 --> 00:03:51,840  
it's still better to choose the the

104  
00:03:55,110 --> 00:03:53,439  
fellow that's been training for a year

105  
00:03:56,869 --> 00:03:55,120  
and a half in order to reduce the

106  
00:03:58,470 --> 00:03:56,879  
overall mission risk

107  
00:04:01,509 --> 00:03:58,480  
so

108  
00:04:03,910 --> 00:04:01,519  
we went forward with the plan back to my

109  
00:04:06,309 --> 00:04:03,920  
boss brent

110  
00:04:09,350 --> 00:04:06,319  
both peggy and mark sat down with myself

111  
00:04:11,190 --> 00:04:09,360  
my deputy janet cavandi and my assistant

112  
00:04:12,789 --> 00:04:11,200  
brian kelly

113  
00:04:15,190 --> 00:04:12,799

and we we wanted to talk about the

114

00:04:17,590 --> 00:04:15,200

situation and make sure we

115

00:04:19,909 --> 00:04:17,600

had thought about all the the potential

116

00:04:21,670 --> 00:04:19,919

risks to the mission and address those

117

00:04:22,710 --> 00:04:21,680

appropriately before we made a final

118

00:04:23,749 --> 00:04:22,720

decision

119

00:04:25,830 --> 00:04:23,759

so

120

00:04:28,629 --> 00:04:25,840

uh they came to me mark had a very good

121

00:04:29,830 --> 00:04:28,639

plan he had

122

00:04:31,270 --> 00:04:29,840

he had

123

00:04:33,030 --> 00:04:31,280

a routine

124

00:04:35,830 --> 00:04:33,040

that he explained to me

125

00:04:37,749 --> 00:04:35,840

how his days would proceed

126

00:04:40,870 --> 00:04:37,759

and how he would be able to commit the

127

00:04:43,430 --> 00:04:40,880

time necessary to train for the mission

128

00:04:45,909 --> 00:04:43,440

that made me feel feel comfortable

129

00:04:47,909 --> 00:04:45,919

we also discussed

130

00:04:49,350 --> 00:04:47,919

with our doctors

131

00:04:51,590 --> 00:04:49,360

and who were in communication with

132

00:04:52,710 --> 00:04:51,600

gabrielle's doctors about the potential

133

00:04:55,590 --> 00:04:52,720

risk of

134

00:04:57,749 --> 00:04:55,600

of her condition changing over the next

135

00:04:59,430 --> 00:04:57,759

eight weeks or so and that

136

00:05:00,550 --> 00:04:59,440

potentially resulting in a change in

137

00:05:02,870 --> 00:05:00,560

mark's

138

00:05:04,870 --> 00:05:02,880

ability to to commit his time to the

139

00:05:05,749 --> 00:05:04,880

mission

140

00:05:07,909 --> 00:05:05,759

and we

141

00:05:10,469 --> 00:05:07,919

we had very good answers from the

142

00:05:12,230 --> 00:05:10,479

doctors mark had a very good plan

143

00:05:13,749 --> 00:05:12,240

but there was a piece that i felt that

144

00:05:15,189 --> 00:05:13,759

was missing

145

00:05:17,110 --> 00:05:15,199

and and so

146

00:05:18,870 --> 00:05:17,120

we looked at

147

00:05:20,870 --> 00:05:18,880

this we said well we don't have to make

148

00:05:22,950 --> 00:05:20,880

the decision this was a week ago we

149

00:05:25,909 --> 00:05:22,960

don't have to make the decision today

150

00:05:29,189 --> 00:05:25,919

we need to make it in about a week so

151  
00:05:32,870 --> 00:05:29,199  
we wanted to put mark's plan into effect

152  
00:05:35,670 --> 00:05:32,880  
so we asked him to train this week

153  
00:05:37,430 --> 00:05:35,680  
with a schedule that would approximate

154  
00:05:39,749 --> 00:05:37,440  
a schedule he would have while he was

155  
00:05:42,070 --> 00:05:39,759  
training for the mission

156  
00:05:44,469 --> 00:05:42,080  
and put you know put his plan into

157  
00:05:47,029 --> 00:05:44,479  
effect and see how it worked out it also

158  
00:05:48,550 --> 00:05:47,039  
gave us an up an opportunity to observe

159  
00:05:50,390 --> 00:05:48,560  
mark

160  
00:05:52,550 --> 00:05:50,400  
obviously as his

161  
00:05:54,870 --> 00:05:52,560  
management it was important for us to

162  
00:05:56,950 --> 00:05:54,880  
know that he would be able to focus

163  
00:06:00,469 --> 00:05:56,960

while he was in training and not be

164

00:06:01,670 --> 00:06:00,479

distracted by gabrielle's situation

165

00:06:05,749 --> 00:06:01,680

up at

166

00:06:11,029 --> 00:06:08,309

so during the week uh mark flew a couple

167

00:06:13,110 --> 00:06:11,039

times in the t-38 with instructors uh he

168

00:06:15,430 --> 00:06:13,120

we asked him to do essentially a

169

00:06:16,950 --> 00:06:15,440

complete checkout

170

00:06:18,629 --> 00:06:16,960

back into the airplane he hadn't flown

171

00:06:21,670 --> 00:06:18,639

since december

172

00:06:22,550 --> 00:06:21,680

so he did that he was in a he was in a a

173

00:06:24,790 --> 00:06:22,560

shuttle

174

00:06:27,350 --> 00:06:24,800

ascent and entry simulation for four

175

00:06:29,110 --> 00:06:27,360

hours uh that gave us an opportunity to

176

00:06:30,710 --> 00:06:29,120

uh to observe him

177

00:06:32,950 --> 00:06:30,720

as well as a couple other training

178

00:06:35,830 --> 00:06:32,960

events during the week he was also away

179

00:06:37,430 --> 00:06:35,840

for an evening which he will have to do

180

00:06:39,830 --> 00:06:37,440

during training there will be times when

181

00:06:41,749 --> 00:06:39,840

he'll be away from houston for a night

182

00:06:43,830 --> 00:06:41,759

or more and so

183

00:06:45,909 --> 00:06:43,840

he was a he was up in d.c for a prayer

184

00:06:47,350 --> 00:06:45,919

breakfast and we felt that that was a

185

00:06:49,270 --> 00:06:47,360

good chance for

186

00:06:52,070 --> 00:06:49,280

for for him to see what it was going to

187

00:06:53,270 --> 00:06:52,080

be like to be away from gabrielle

188

00:06:54,710 --> 00:06:53,280

and i think that was the first time

189

00:06:59,110 --> 00:06:54,720

you've probably been away from her right

190

00:07:01,430 --> 00:06:59,120

since since uh since the the shooting

191

00:07:04,629 --> 00:07:01,440

so we we thought we we had a good

192

00:07:06,629 --> 00:07:04,639

process for bringing back uh mark into

193

00:07:08,790 --> 00:07:06,639

training before we made the decision uh

194

00:07:11,909 --> 00:07:08,800

getting the chance to observe him and

195

00:07:12,870 --> 00:07:11,919

then we met again yesterday uh we talked

196

00:07:15,189 --> 00:07:12,880

to the

197

00:07:17,350 --> 00:07:15,199

to all the individuals or as many as we

198

00:07:19,670 --> 00:07:17,360

could that that were that had a chance

199

00:07:22,629 --> 00:07:19,680

to observe mark during the week

200

00:07:25,990 --> 00:07:22,639

and then we were able to unanimous

201  
00:07:27,749 --> 00:07:26,000  
unanimously decide uh that mark was

202  
00:07:30,390 --> 00:07:27,759  
indeed ready to resume training on

203  
00:07:32,230 --> 00:07:30,400  
monday and fly as the commander

204  
00:07:33,749 --> 00:07:32,240  
of course i don't make that final

205  
00:07:35,749 --> 00:07:33,759  
decision um

206  
00:07:40,870 --> 00:07:35,759  
and

207  
00:07:43,189 --> 00:07:40,880  
made that recommendation to my boss mike

208  
00:07:45,110 --> 00:07:43,199  
coates it then went through

209  
00:07:46,550 --> 00:07:45,120  
obviously the program

210  
00:07:48,230 --> 00:07:46,560  
the aaa at headquarters bill

211  
00:07:49,670 --> 00:07:48,240  
gerstenmaier and all the way to charlie

212  
00:07:51,670 --> 00:07:49,680  
bolden so

213  
00:07:52,550 --> 00:07:51,680

that's how we got from a week ago when

214

00:07:55,510 --> 00:07:52,560

mark

215

00:07:56,390 --> 00:07:55,520

felt he was ready uh to today when we're

216

00:07:58,550 --> 00:07:56,400

we're

217

00:08:00,550 --> 00:07:58,560

you know i think i personally i'm very

218

00:08:03,510 --> 00:08:00,560

glad to be able to have mark back as the

219

00:08:05,510 --> 00:08:03,520

commander of 134.

220

00:08:07,909 --> 00:08:05,520

so coincidentally

221

00:08:09,670 --> 00:08:07,919

we had a little bit of a launch slip

222

00:08:12,629 --> 00:08:09,680

about the same time that this happened

223

00:08:15,830 --> 00:08:12,639

so our launch date moved from

224

00:08:18,790 --> 00:08:15,840

earlier in april to april 19th

225

00:08:19,830 --> 00:08:18,800

and before that we had another slip that

226

00:08:21,909 --> 00:08:19,840

moved us

227

00:08:23,430 --> 00:08:21,919

from february to april and when that

228

00:08:24,950 --> 00:08:23,440

happens it frees up a lot of time in

229

00:08:27,670 --> 00:08:24,960

your launch schedule so we didn't we

230

00:08:29,430 --> 00:08:27,680

didn't have a busy training flow even

231

00:08:30,469 --> 00:08:29,440

before january 8th

232

00:08:32,550 --> 00:08:30,479

actually

233

00:08:35,190 --> 00:08:32,560

which is what we like you know something

234

00:08:37,670 --> 00:08:35,200

pretty reasonable rather than

235

00:08:39,750 --> 00:08:37,680

a training flow that is jam-packed and

236

00:08:43,190 --> 00:08:39,760

that's because of our launch date moving

237

00:08:44,870 --> 00:08:43,200

so those extra days we got

238

00:08:45,910 --> 00:08:44,880

turned out that it helped

239

00:08:48,310 --> 00:08:45,920

so

240

00:08:49,990 --> 00:08:48,320

actually i didn't really miss anything

241

00:08:51,910 --> 00:08:50,000

maybe

242

00:08:53,670 --> 00:08:51,920

one

243

00:08:56,389 --> 00:08:53,680

orbit sim

244

00:08:59,509 --> 00:08:56,399

for a what's called dock late inspection

245

00:09:00,710 --> 00:08:59,519

but my crew did a great job at it and

246

00:09:02,630 --> 00:09:00,720

so they don't they don't actually need

247

00:09:03,990 --> 00:09:02,640

me i'm sitting here today

248

00:09:05,430 --> 00:09:04,000

um so

249

00:09:11,030 --> 00:09:05,440

just that one event

250

00:09:16,150 --> 00:09:13,910

i have not had that discussion

251  
00:09:17,430 --> 00:09:16,160  
we do have email on orbit so i can stay

252  
00:09:19,990 --> 00:09:17,440  
up to date

253  
00:09:22,790 --> 00:09:20,000  
with with email we do

254  
00:09:25,590 --> 00:09:22,800  
have what's called an ip phone on board

255  
00:09:26,870 --> 00:09:25,600  
my experience as a space space shuttle

256  
00:09:29,430 --> 00:09:26,880  
crew member is i don't use it all that

257  
00:09:31,829 --> 00:09:29,440  
often uh it will probably be

258  
00:09:33,910 --> 00:09:31,839  
similar to that so my plan is really not

259  
00:09:35,829 --> 00:09:33,920  
to ask for anything extra

260  
00:09:38,150 --> 00:09:35,839  
and any updates i need i can get via

261  
00:09:39,110 --> 00:09:38,160  
email

262  
00:09:42,310 --> 00:09:39,120  
well

263  
00:09:45,750 --> 00:09:42,320

bob i don't want to get into details on

264

00:09:47,030 --> 00:09:45,760

her condition or her prognosis

265

00:09:48,710 --> 00:09:47,040

but

266

00:09:51,190 --> 00:09:48,720

let me say that

267

00:09:54,230 --> 00:09:51,200

she improves every day

268

00:09:55,750 --> 00:09:54,240

the neurosurgeon and the

269

00:09:59,269 --> 00:09:55,760

trauma doc's certainly out of the

270

00:10:01,350 --> 00:09:59,279

picture now the the icu doctor

271

00:10:02,949 --> 00:10:01,360

but her rehab doctors are just

272

00:10:05,030 --> 00:10:02,959

incredibly

273

00:10:06,949 --> 00:10:05,040

impressed with her progress and the fact

274

00:10:08,470 --> 00:10:06,959

that the slope of that curve is very

275

00:10:12,790 --> 00:10:08,480

steep they think she's going to make a

276

00:10:12,800 --> 00:10:16,949

did i personally get the

277

00:10:20,470 --> 00:10:18,630

with her that okay comfortable with

278

00:10:21,350 --> 00:10:20,480

people well i know her i know her very

279

00:10:23,750 --> 00:10:21,360

well

280

00:10:26,630 --> 00:10:23,760

and she would be very comfortable with

281

00:10:29,509 --> 00:10:26,640

the decision that i made

282

00:10:32,230 --> 00:10:29,519

well when i told her mom in the icu in

283

00:10:34,710 --> 00:10:32,240

tucson that i most likely would not be

284

00:10:36,389 --> 00:10:34,720

flying sts-134

285

00:10:37,670 --> 00:10:36,399

she said something like what are you

286

00:10:39,190 --> 00:10:37,680

kidding me

287

00:10:40,949 --> 00:10:39,200

you know

288

00:10:42,069 --> 00:10:40,959

you you have to go do that and i

289

00:10:43,190 --> 00:10:42,079

explained to her well i'm not going to

290

00:10:44,949 --> 00:10:43,200

leave

291

00:10:46,870 --> 00:10:44,959

and i see you know the icu when

292

00:10:48,550 --> 00:10:46,880

gabrielle's in the icu that's just not

293

00:10:49,829 --> 00:10:48,560

going to happen

294

00:10:52,470 --> 00:10:49,839

you know and it's in it's in another

295

00:10:53,590 --> 00:10:52,480

state so you know i thought that

296

00:10:55,430 --> 00:10:53,600

that that

297

00:10:57,670 --> 00:10:55,440

was um

298

00:10:59,430 --> 00:10:57,680

you know that that was that was it

299

00:11:01,350 --> 00:10:59,440

and then i had a similar conversation

300

00:11:04,389 --> 00:11:01,360

with her father so they've been very

301

00:11:07,750 --> 00:11:04,399

supportive right from the beginning

302

00:11:10,069 --> 00:11:07,760

so my flight surgeon joe durbay

303

00:11:11,829 --> 00:11:10,079

told me when we were even back in tucson

304

00:11:13,829 --> 00:11:11,839

he says when when you get to the point

305

00:11:15,350 --> 00:11:13,839

of making a decision make the decision

306

00:11:16,630 --> 00:11:15,360

live with it for a couple days and then

307

00:11:17,990 --> 00:11:16,640

make the other decision and live with

308

00:11:19,910 --> 00:11:18,000

that one for a couple days so i actually

309

00:11:21,829 --> 00:11:19,920

went through that process over

310

00:11:23,110 --> 00:11:21,839

over a week ago

311

00:11:25,110 --> 00:11:23,120

and

312

00:11:29,750 --> 00:11:25,120

so i got a sense of what it would be

313

00:11:32,389 --> 00:11:29,760

like and as expected today a week after

314

00:11:33,509 --> 00:11:32,399

uh i think i first spoke to peggy about

315

00:11:34,710 --> 00:11:33,519

this

316

00:11:36,949 --> 00:11:34,720

you know i feel

317

00:11:39,110 --> 00:11:36,959

very confident that i made the made the

318

00:11:41,190 --> 00:11:39,120

right decision not only for me but for

319

00:11:43,350 --> 00:11:41,200

my crew members for my family

320

00:11:45,670 --> 00:11:43,360

and for my wife

321

00:11:47,110 --> 00:11:45,680

mark given the positive nature of how

322

00:11:48,230 --> 00:11:47,120

things have been going with

323

00:11:49,670 --> 00:11:48,240

rehabilitation do you have any hopes

324

00:11:50,870 --> 00:11:49,680

that she can come here for the launch is

325

00:11:53,430 --> 00:11:50,880

that something that you think might be a

326

00:11:55,190 --> 00:11:53,440

possibility absolutely i mean i have

327

00:11:56,790 --> 00:11:55,200

every intention that that she'll be

328

00:11:58,949 --> 00:11:56,800

there for the launch i've already talked

329

00:12:00,230 --> 00:11:58,959

to her doctors about it so there should

330

00:12:04,550 --> 00:12:00,240

be

331

00:12:05,670 --> 00:12:04,560

she can't go to the launch so that's

332

00:12:07,030 --> 00:12:05,680

that's that's

333

00:12:08,829 --> 00:12:07,040

i haven't spoken to peggy and brent

334

00:12:10,629 --> 00:12:08,839

about that yet but that's that's in my

335

00:12:11,990 --> 00:12:10,639

plan

336

00:12:14,150 --> 00:12:12,000

we really

337

00:12:15,910 --> 00:12:14,160

did some soul searching you know we

338

00:12:19,110 --> 00:12:15,920

researched uh

339

00:12:21,590 --> 00:12:19,120

gabby's condition and uh you know mark's

340

00:12:23,990 --> 00:12:21,600

support system and really looked into

341

00:12:24,949 --> 00:12:24,000

this we we think this is a very doable
