

ЖАЛГА БЕРУ 54-85-83 АРЕНА

SCOTT KELLY
СКОТТ КЕЛЛИ

1
00:00:05,230 --> 00:00:04,150
expedition 26 commander scott kelly

2
00:00:08,150 --> 00:00:05,240
welcome home

3
00:00:10,310 --> 00:00:08,160
159 days in space

4
00:00:12,549 --> 00:00:10,320
quite an expedition uh what were your

5
00:00:14,310 --> 00:00:12,559
thoughts as you undocked today

6
00:00:15,910 --> 00:00:14,320
and the soyuz backed away from the

7
00:00:17,510 --> 00:00:15,920
station that had been your home for six

8
00:00:19,429 --> 00:00:17,520
months

9
00:00:21,910 --> 00:00:19,439
well you know i kind of i guess i

10
00:00:23,750 --> 00:00:21,920
reflected on

11
00:00:25,429 --> 00:00:23,760
how much work we did and how much we

12
00:00:26,550 --> 00:00:25,439
accomplished

13
00:00:30,310 --> 00:00:26,560

thought that

14

00:00:33,350 --> 00:00:30,320
you know it's such an amazing

15

00:00:39,190 --> 00:00:33,360
facility that we've built

16

00:00:42,389 --> 00:00:40,709
accomplish something like that building

17

00:00:44,310 --> 00:00:42,399
that and using it

18

00:00:46,150 --> 00:00:44,320
that's a place i'm going to miss i

19

00:00:47,910 --> 00:00:46,160
certainly uh look forward and look

20

00:00:50,069 --> 00:00:47,920
forward to getting back to earth you

21

00:00:51,910 --> 00:00:50,079
know i have a lot more things i i look

22

00:00:58,549 --> 00:00:51,920
forward to

23

00:01:01,110 --> 00:01:00,229
the impressions you had

24

00:01:03,110 --> 00:01:01,120
as

25

00:01:04,789 --> 00:01:03,120
you left the station

26

00:01:06,230 --> 00:01:04,799

what was entry like

27

00:01:07,590 --> 00:01:06,240

your first impressions as they opened

28

00:01:09,510 --> 00:01:07,600

the hatch it looked like a scene out of

29

00:01:13,109 --> 00:01:09,520

the north pole

30

00:01:15,830 --> 00:01:13,119

well entry it was you know i've heard so

31

00:01:17,429 --> 00:01:15,840

much about how the soyuz entry is kind

32

00:01:18,310 --> 00:01:17,439

of uh

33

00:01:21,830 --> 00:01:18,320

you know

34

00:01:23,830 --> 00:01:21,840

a little on the rough side so it was

35

00:01:26,230 --> 00:01:23,840

sort of what i expected

36

00:01:28,070 --> 00:01:26,240

which is a series of explosions followed

37

00:01:29,910 --> 00:01:28,080

by a car crash

38

00:01:31,109 --> 00:01:29,920

and uh

39

00:01:32,870 --> 00:01:31,119

and then

40

00:01:35,910 --> 00:01:32,880

when the hatch opened it's just quite

41

00:01:38,390 --> 00:01:35,920

refreshing to get that cold air and

42

00:01:39,670 --> 00:01:38,400

you know snow blowing inside the capsule

43

00:01:43,270 --> 00:01:39,680

it was

44

00:01:46,389 --> 00:01:43,280

definitely a one once in a lifetime

45

00:01:49,429 --> 00:01:47,670

you're fresh

46

00:01:51,109 --> 00:01:49,439

out of your mission here but in

47

00:01:52,550 --> 00:01:51,119

reflection what do you consider to be

48

00:01:55,270 --> 00:01:52,560

the major accomplishment of your

49

00:01:56,950 --> 00:01:55,280

expedition it was so much to choose from

50

00:01:58,550 --> 00:01:56,960

you know that's really hard to say

51

00:02:00,469 --> 00:01:58,560

because because we

52

00:02:02,670 --> 00:02:00,479

we did so much you know there were so

53

00:02:05,749 --> 00:02:02,680

many visiting vehicles there was

54

00:02:08,389 --> 00:02:05,759

a lot of

55

00:02:10,070 --> 00:02:08,399

maintenance done on certain systems of

56

00:02:13,110 --> 00:02:10,080

the space station that i was involved in

57

00:02:14,710 --> 00:02:13,120

certainly a lot of science was done

58

00:02:16,550 --> 00:02:14,720

i think

59

00:02:18,470 --> 00:02:16,560

it's really hard to say there's one

60

00:02:21,110 --> 00:02:18,480

major accomplishment i think it's really

61

00:02:23,830 --> 00:02:21,120

the accomplishment of the whole team and

62

00:02:25,430 --> 00:02:23,840

putting such a complicated uh plan

63

00:02:27,910 --> 00:02:25,440

together and

64

00:02:29,589 --> 00:02:27,920

executing it and i guess that's what i'm

65

00:02:31,589 --> 00:02:29,599

most proud of

66

00:02:33,030 --> 00:02:31,599

scott it goes without saying that the

67

00:02:34,790 --> 00:02:33,040

the wounding of your sister-in-law in

68

00:02:36,470 --> 00:02:34,800

january represented the test of a

69

00:02:38,550 --> 00:02:36,480

lifetime

70

00:02:40,229 --> 00:02:38,560

for you in orbit

71

00:02:42,790 --> 00:02:40,239

and obviously for your brother how

72

00:02:43,910 --> 00:02:42,800

difficult a period of time was that for

73

00:02:44,869 --> 00:02:43,920

you

74

00:02:52,390 --> 00:02:44,879

as

75

00:02:55,110 --> 00:02:52,400

time of crisis like that well you know

76

00:02:55,830 --> 00:02:55,120

it certainly was difficult

77

00:03:03,110 --> 00:02:55,840

now

78

00:03:05,190 --> 00:03:03,120

trained to

79

00:03:06,550 --> 00:03:05,200

deal with as military pilots you know

80

00:03:09,190 --> 00:03:06,560

just

81

00:03:11,350 --> 00:03:09,200

putting your uh

82

00:03:13,990 --> 00:03:11,360

you know personal issues aside and

83

00:03:16,070 --> 00:03:14,000

focusing on what your job is so

84

00:03:18,550 --> 00:03:16,080

although i would have preferred to be

85

00:03:19,430 --> 00:03:18,560

able to you know help them in person

86

00:03:22,149 --> 00:03:19,440

and

87

00:03:24,070 --> 00:03:22,159

you know assist as as best i could

88

00:03:25,910 --> 00:03:24,080

i uh you know recognized that my place

89

00:03:27,990 --> 00:03:25,920

was on the space station and

90

00:03:30,390 --> 00:03:28,000

you know just focused on my work and i

91

00:03:31,910 --> 00:03:30,400

called him and my kids as much as i

92

00:03:34,070 --> 00:03:31,920

could and other you know friends and

93

00:03:35,750 --> 00:03:34,080

family as much as i could to try to

94

00:03:38,390 --> 00:03:35,760

support them and you know there's not a

95

00:03:39,830 --> 00:03:38,400

whole lot of support you can provide

96

00:03:41,750 --> 00:03:39,840

in space other than you know just

97

00:03:43,589 --> 00:03:41,760

emotional on the phone but i tried to do

98

00:03:45,270 --> 00:03:43,599

that as best i could

99

00:03:46,869 --> 00:03:45,280

the reports on her recovery are so

100

00:03:48,949 --> 00:03:46,879

encouraging what are you looking forward

101
00:03:52,149 --> 00:03:48,959
to the most when you get reunited with

102
00:03:56,149 --> 00:03:54,390
um you know just seeing him and talking

103
00:03:57,350 --> 00:03:56,159
to him and seeing how he's doing and you

104
00:04:01,110 --> 00:03:57,360
know

105
00:04:03,509 --> 00:04:01,120
talking in person versus uh a cell phone

106
00:04:05,830 --> 00:04:03,519
with or a satellite phone with very

107
00:04:07,830 --> 00:04:05,840
sporadic uh coverage that you're always

108
00:04:09,910 --> 00:04:07,840
waiting for the uh

109
00:04:13,589 --> 00:04:09,920
the uh you know when the the satellite

110
00:04:15,270 --> 00:04:13,599
pass is over so that'll be nice

111
00:04:17,670 --> 00:04:15,280
scott final question your your

112
00:04:19,189 --> 00:04:17,680
expedition was so much triumph tinged

113
00:04:20,310 --> 00:04:19,199

with the tragedy

114

00:04:22,629 --> 00:04:20,320

uh

115

00:04:24,629 --> 00:04:22,639

for you when you when you think you'll

116

00:04:25,670 --> 00:04:24,639

have time to reflect on it all what do

117

00:04:30,070 --> 00:04:25,680

you think

118

00:04:36,070 --> 00:04:33,430

well certainly the low is when uh gabby

119

00:04:38,310 --> 00:04:36,080

was shot along with all those the other

120

00:04:39,510 --> 00:04:38,320

tucson victims without a doubt i mean

121

00:04:41,590 --> 00:04:39,520

when you hear

122

00:04:43,510 --> 00:04:41,600

a uh you know you get a phone call that

123

00:04:45,990 --> 00:04:43,520

the chief of the astronaut office wants

124

00:04:48,710 --> 00:04:46,000

to talk to you immediately

125

00:04:50,230 --> 00:04:48,720

you know you know it's not good news

126
00:04:54,830 --> 00:04:50,240
and

127
00:04:59,030 --> 00:04:54,840
very

128
00:05:03,430 --> 00:05:01,510
the highs uh

129
00:05:04,870 --> 00:05:03,440
you know it's really like like

130
00:05:06,950 --> 00:05:04,880
how i answered the other questions

131
00:05:08,710 --> 00:05:06,960
really kind of hard to say

132
00:05:09,590 --> 00:05:08,720
uh because we

133
00:05:11,189 --> 00:05:09,600
had

134
00:05:12,870 --> 00:05:11,199
you know a lot of

135
00:05:15,670 --> 00:05:12,880
different

136
00:05:17,110 --> 00:05:15,680
variety of work with visiting vehicles

137
00:05:18,710 --> 00:05:17,120
and

138
00:05:21,189 --> 00:05:18,720

working on certain systems on the space

139

00:05:23,670 --> 00:05:21,199

station you know certainly ulf

140

00:05:25,909 --> 00:05:23,680

five being there was

141

00:05:27,270 --> 00:05:25,919

you know a lot of fun to have visitors

142

00:05:30,710 --> 00:05:27,280

and

143

00:05:33,430 --> 00:05:30,720

the htv work we did was was

144

00:05:35,510 --> 00:05:33,440

pretty complex with the robotics and

145

00:05:37,110 --> 00:05:35,520

getting it you know

146

00:05:38,629 --> 00:05:37,120

first birthed and then you know

147

00:05:40,790 --> 00:05:38,639

partially unloaded and then moved and

148

00:05:43,990 --> 00:05:40,800

then moved back

149

00:05:46,150 --> 00:05:44,000

so i would say those those two things

150

00:05:48,310 --> 00:05:46,160

scott kelly expedition 26 commander
