

1
00:00:04,550 --> 00:00:03,030
the year is 1958 a top secret research

2
00:00:06,550 --> 00:00:04,560
project investigating the nature of

3
00:00:09,030 --> 00:00:06,560
quantum uncertainty splits the universe

4
00:00:10,950 --> 00:00:09,040
into two parallel realities one with

5
00:00:11,990 --> 00:00:10,960
nasa developed technologies and one

6
00:00:14,070 --> 00:00:12,000
without

7
00:00:15,749 --> 00:00:14,080
now two american families live against

8
00:00:17,670 --> 00:00:15,759
their will one at the forefront of

9
00:00:23,590 --> 00:00:17,680
progress and one in a post-modern

10
00:00:26,630 --> 00:00:25,189
our story begins with the average

11
00:00:28,790 --> 00:00:26,640
american couple

12
00:00:30,150 --> 00:00:28,800
susie and john johnson are busy beavers

13
00:00:32,630 --> 00:00:30,160

and the demands of modern life

14

00:00:33,990 --> 00:00:32,640

necessitate a good night's rest let's

15

00:00:35,430 --> 00:00:34,000

check in with them and see how they're

16

00:00:37,670 --> 00:00:35,440

doing

17

00:00:39,830 --> 00:00:37,680

uh-oh seems not all as well in the

18

00:00:44,470 --> 00:00:39,840

johnson household that mattress doesn't

19

00:00:56,549 --> 00:00:47,110

hours later they wake up unrelaxed and

20

00:01:03,750 --> 00:00:58,310

the mrs is quite persnickety this

21

00:01:03,760 --> 00:01:09,750

good luck being productive today john

22

00:01:15,749 --> 00:01:11,750

if only they lived in a world with nasa

23

00:01:20,710 --> 00:01:18,469

like the andersons fortunately also lead

24

00:01:22,469 --> 00:01:20,720

average american lives however with the

25

00:01:24,469 --> 00:01:22,479

influence of conveniences like temper

26

00:01:27,429 --> 00:01:24,479

material they appear to be enjoying

27

00:01:28,950 --> 00:01:27,439

their rest

28

00:01:30,950 --> 00:01:28,960

temper material is a memory foam

29

00:01:32,550 --> 00:01:30,960

matching the body's contour returning to

30

00:01:33,830 --> 00:01:32,560

its original shape once pressure is

31

00:01:35,590 --> 00:01:33,840

removed

32

00:01:37,190 --> 00:01:35,600

other than their mattress temper

33

00:01:39,350 --> 00:01:37,200

materials may be found in seat

34

00:01:41,990 --> 00:01:39,360

cushioning furniture padding and even

35

00:01:43,910 --> 00:01:42,000

artificial limb socket lining

36

00:01:47,109 --> 00:01:43,920

with this nasa develop technology

37

00:01:50,550 --> 00:01:47,119

they'll have more energy for their day

38

00:01:56,069 --> 00:01:52,630

looks like andy is ready to take on the

39

00:01:58,550 --> 00:01:56,950

oh

40

00:02:08,229 --> 00:01:58,560

and now it's time to check back with our

41

00:02:11,910 --> 00:02:09,669

what have we here

42

00:02:23,270 --> 00:02:11,920

taking care of spring cleaning early hey

43

00:02:27,510 --> 00:02:26,070

with that big bulky vacuum suzy is sure

44

00:02:43,350 --> 00:02:27,520

going to have a tough time hitting those

45

00:02:48,390 --> 00:02:44,790

good luck susie

46

00:02:56,309 --> 00:02:52,309

which is also doing some tidying up

47

00:03:00,949 --> 00:02:58,470

butch is using the latest in handheld

48

00:03:02,949 --> 00:03:00,959

suction technology

49

00:03:05,670 --> 00:03:02,959

originally developed for self-contained

50

00:03:07,430 --> 00:03:05,680

lunar core sample extraction drills

51
00:03:10,070 --> 00:03:07,440
nickel cadmium batteries provide

52
00:03:12,869 --> 00:03:10,080
plentiful portable power for on-the-go

53
00:03:16,550 --> 00:03:14,390
other applications exist in the

54
00:03:18,790 --> 00:03:16,560
industrial and medical fields including

55
00:03:20,869 --> 00:03:18,800
mobile hand tools shrub trimmers and

56
00:03:23,990 --> 00:03:20,879
grass shears and even orthopedic

57
00:03:24,000 --> 00:03:33,350
uh-oh you missed a spot

58
00:03:37,670 --> 00:03:35,750
way to go butch

59
00:03:39,509 --> 00:03:37,680
you sure showed those dust bunnies whose

60
00:03:41,509 --> 00:03:39,519
boss

61
00:03:46,470 --> 00:03:41,519
i wonder how susie is dealing with her

62
00:03:49,270 --> 00:03:47,910
oh my

63
00:03:51,270 --> 00:03:49,280

looks like she's going to be tied up

64

00:03:57,830 --> 00:03:51,280

with this for quite a while

65

00:04:01,830 --> 00:03:59,990

after a long day at the office john is

66

00:04:09,990 --> 00:04:01,840

looking forward to a relaxing evening at

67

00:04:10,000 --> 00:04:15,270

looks like john's plans left to wait

68

00:04:19,030 --> 00:04:17,349

how's the fresh air john

69

00:04:21,349 --> 00:04:19,040

those gasoline fumes contain many

70

00:04:23,430 --> 00:04:21,359

carcinogens including benzene and other

71

00:04:24,469 --> 00:04:23,440

anti-knocking additives

72

00:04:25,830 --> 00:04:24,479

oh well

73

00:04:28,230 --> 00:04:25,840

at least your wallet's doing better than

74

00:04:31,749 --> 00:04:28,240

your lungs

75

00:04:33,030 --> 00:04:31,759

nope that doesn't look too good either

76

00:04:36,150 --> 00:04:33,040

john

77

00:04:38,310 --> 00:04:36,160

maybe andy's ride home was a more

78

00:04:41,270 --> 00:04:38,320

pleasant one

79

00:04:44,310 --> 00:04:41,280

oh she's already here enjoying herself i

80

00:04:46,070 --> 00:04:44,320

see but how did she get home so fast

81

00:04:47,590 --> 00:04:46,080

dry state-of-the-art electric car

82

00:04:48,950 --> 00:04:47,600

powered by nasa developed space

83

00:04:50,790 --> 00:04:48,960

batteries

84

00:04:52,469 --> 00:04:50,800

nasa embarks on many long duration

85

00:04:54,790 --> 00:04:52,479

missions requiring high performance

86

00:04:56,710 --> 00:04:54,800

batteries operable in the harsh oxygen

87

00:04:59,510 --> 00:04:56,720

deprived conditions as famously

88

00:05:01,110 --> 00:04:59,520

pioneered on the apollo man lunar rover

89

00:05:03,510 --> 00:05:01,120

not only did she avoid a stop at the

90

00:05:09,270 --> 00:05:03,520

pump she saved some hard-earned cash

91

00:05:13,830 --> 00:05:11,270

and so our story ends

92

00:05:15,909 --> 00:05:13,840

two realities are presented for you here

93

00:05:18,390 --> 00:05:15,919

unlike these american families your

94

00:05:20,150 --> 00:05:18,400

world is your choice

95

00:05:21,510 --> 00:05:20,160

whether it's practical technologies used

96

00:05:23,670 --> 00:05:21,520

around the house or life-changing

97

00:05:26,070 --> 00:05:23,680

innovations used around the world nasa

98

00:05:27,990 --> 00:05:26,080

developed technologies are everywhere

99

00:05:28,830 --> 00:05:28,000

for more information on nasa spin-offs

100

00:05:31,749 --> 00:05:28,840

visit
