

1
00:00:02,390 --> 00:00:05,790

>> I just want to say on
behalf of the STS-134 crew,

2
00:00:06,270 --> 00:00:10,536

that we had a very successful
mission working with Expedition 28.

3
00:00:11,490 --> 00:00:17,090

It's been a great number of days docked at
the Alpha Magnetic Spectrometer installed,

4
00:00:17,600 --> 00:00:21,733

which is really a remarkable
thing for physics and for science.

5
00:00:22,370 --> 00:00:24,070

And that sensor is already collecting massive
amounts of data, and we're looking forward

6
00:00:26,470 --> 00:00:27,173

to hearing what those discoveries are.

7
00:00:28,300 --> 00:00:33,966

We got ELC-3 installed, did four very
successful space walks, and a bunch of transfer.

8
00:00:35,460 --> 00:00:41,460

And it was a really good ten days or so that
we were docked here, and we're looking forward

9
00:00:42,310 --> 00:00:43,736

to getting home, and we're going to
leave these guys to some peace and quiet,

10
00:00:45,950 --> 00:00:48,950

and not disturb their space station any more.

11
00:00:50,050 --> 00:00:56,050

On this Memorial Day weekend, I'd also like to say that, you know, as a crew we're thinking

12

00:00:57,570 --> 00:01:01,570

of the veterans out there that have lost their lives in wars,

13

00:01:01,570 --> 00:01:04,503

especially recently in Afghanistan and Iraq.

14

00:01:04,750 --> 00:01:05,143

And, you know, it's really important for the American people to honor those folks

15

00:01:09,690 --> 00:01:13,290

over this weekend, but particularly tomorrow on Monday.

16

00:01:13,770 --> 00:01:17,370

I'm going to turn it over to Ron Garan for a few words.

17

00:01:19,340 --> 00:01:19,666

>> Thanks, Mark.

18

00:01:20,080 --> 00:01:20,270

It was really great seeing you guys.

19

00:01:22,290 --> 00:01:26,890

It was great getting to spend times on the incredible orbital complex.

20

00:01:28,270 --> 00:01:29,086

And, you know, we were just in awe of the finely oiled machine

21

00:01:31,520 --> 00:01:34,053

that was STS-134, [inaudible] STS-134.

22

00:01:34,430 --> 00:01:39,896

And so it was, great EVAs, great robotics,
great transfer, the AMS being installed.

23

00:01:40,630 --> 00:01:40,666

Special thanks to Taz and Spanky for all
your work on the oxygen generation system,

24

00:01:46,060 --> 00:01:46,400

on the carbon dioxide removal assembly.

25

00:01:48,320 --> 00:01:48,613

It's been really great.

26

00:01:49,560 --> 00:01:54,426

And we're all looking forward to seeing
the mysteries solved from the AMS.

27

00:01:54,890 --> 00:02:00,690

So on behalf of Expedition 27, Expedition 28,
the entire ISS team, we want to thank you,

28

00:02:02,520 --> 00:02:08,186

and the entire STS-134 mission team for
leaving the space station ready for, you know,

29

00:02:09,360 --> 00:02:10,036

it's continued utilization
for at least the next decade.

30

00:02:12,350 --> 00:02:12,770

You're really left us in good shape, and it
was a really a big success, and proud to be,

31

00:02:17,730 --> 00:02:18,230

have a really, really small part of it.

32

00:02:19,830 --> 00:02:20,830

>> So.

33

00:02:36,510 --> 00:02:38,576

[Talking in foreign language]

34

00:02:39,120 --> 00:02:43,853

>> To see the shuttle crew visiting here at a time when we were working,

35

00:02:45,850 --> 00:02:49,116

and I'm happy that the crew has completed the task

36

00:02:51,960 --> 00:02:56,026

and I'm glad they enjoyed staying and working with us as well.

37

00:02:56,630 --> 00:02:59,296

>> Thank you very much and soft landing.

38

00:03:02,360 --> 00:03:07,826

>> Hugs and handshakes all around, between the Expedition 28 crew members and those

39

00:03:55,120 --> 00:03:57,520

of the space shuttle Endeavour crew.

40

00:03:57,850 --> 00:04:01,250

You heard there talking first, Commander Mark Kelly.

41

00:04:03,500 --> 00:04:06,566

He was followed by flight engineer, Ron Garan,

42

00:04:06,930 --> 00:04:10,196

and the Space Station Commander, Andrei Borisenko.

43

00:04:24,490 --> 00:04:28,423

>> Drew Feustel [assume spelling] there helping to drag some
