

1

00:00:01,176 --> 00:00:05,936

[Commentator:] And just coming into view, some of the plumes occurring throughout the state.

2

00:00:21,416 --> 00:00:23,956

[Mike Fossum:] Hey Houston, Station, Mike on two.

3

00:00:24,406 --> 00:00:31,116

Yeah, we're coming on just across the coast to see Houston quite clearly, and it is a sad sight

4

00:00:31,116 --> 00:00:33,166

with all the fires burning in Texas right now.

5

00:00:33,166 --> 00:00:42,186

See one very major one and three smaller ones.

6

00:00:43,056 --> 00:00:46,716

[CAPCOM:] Copy that, Mike, and it is going out to the world.

7

00:00:46,956 --> 00:00:47,516

Good view.

8

00:00:47,516 --> 00:00:49,526

Thanks. Appreciate it.

9

00:00:55,796 --> 00:00:58,076

[CAPCOM:] Station, Houston on two for Ron.

10

00:00:58,146 --> 00:00:59,676

Need you to hit pause again.

11

00:00:59,676 --> 00:01:03,626

We appear to have some issues with our IAPS setup.

12

00:01:16,476 --> 00:01:32,066

[Commentator:] As you can see, just passing into the left of the view, one of the larger plumes,

13

00:01:32,446 --> 00:01:35,346

presumably from the wildfires occurring within the state.

14

00:01:35,606 --> 00:01:37,486

Also in view is the Colorado River.

15

00:01:37,986 --> 00:01:43,156

As you heard, NASA astronaut Mike Fossum also on board and monitoring the views

16

00:01:43,156 --> 00:01:48,676

and likely gathering some images using the still cameras on board as well.

17

00:01:48,846 --> 00:02:17,166

[Commentator:] The space station itself continuing

18

00:02:17,166 --> 00:02:22,326

on a northeasterly track, now over the coast of Louisiana.

19

00:02:22,626 --> 00:02:24,046

This view, looking back...

20

00:02:27,366 --> 00:02:29,346

Looking back towards the state of Texas,

21

00:02:29,446 --> 00:02:35,316

this view from a handheld camera by Mike Fossum in the cupola.

22

00:02:38,096 --> 00:02:42,306

Switching now to a view from the camera mounted on the exterior of the spacecraft,

23

00:02:42,706 --> 00:02:46,136

the communications and tracking
officer reporting best views

24

00:02:46,136 --> 00:02:48,216

from the port or left side of the vehicle.

25

00:02:48,636 --> 00:02:52,076

Looking back towards the state
of Texas as the vehicle continues

26

00:02:52,076 --> 00:03:04,926

to travel 17,500 miles per hour in a
northeasterly track across the United States.

27

00:04:02,326 --> 00:04:05,116

[Commentator:] We're switching back
to views from the handheld camera

28

00:04:05,396 --> 00:04:14,786

by NASA astronaut Mike Fossum, who's positioned
in the cupola, a small module but outfitted

29

00:04:14,786 --> 00:04:18,776

with large viewing windows
where he can capture this view.

30

00:04:18,776 --> 00:04:22,456

The International Space Station
now just approaching West Virginia
