

1
00:00:14,426 --> 00:00:19,716
Commentator: U.S. astronauts and JAXA
astronaut [Satoshi] Furukawa are busy working

2
00:00:19,716 --> 00:00:20,146
this morning.

3
00:00:20,146 --> 00:00:24,686
You've seen Ron Garan as he was working
on that Microgravity Science Glovebox.

4
00:00:25,486 --> 00:00:26,486
Here he is again.

5
00:00:26,486 --> 00:00:32,906
And in addition to him, we saw Mike Fossum as
he was working on the card replacement on one

6
00:00:32,906 --> 00:00:35,326
of the computers onboard the
International Space Station.

7
00:01:04,186 --> 00:01:06,606
The crew awoke this morning
at 1 a.m. They've got

8
00:01:06,606 --> 00:01:09,216
about six hours left before they end their day.

9
00:01:09,216 --> 00:01:13,396
They'll end their day with a daily
planning conference which is a typical day

10
00:01:13,396 --> 00:01:17,326
for the International Space Station
crew, followed by some off-duty time

11
00:01:17,326 --> 00:01:22,566
and then crew sleep begins

at 4:30 p.m. central time.

12

00:02:06,876 --> 00:02:24,206

This is Mission COnTrol Houston.

13

00:02:24,206 --> 00:02:29,856

Just a reminder that coming up on
Wednesday there will be a command change.

14

00:02:29,856 --> 00:02:34,126

Handover of the command from
Commander Borisenko...

15

00:02:34,126 --> 00:02:35,106

POC: ...Go ahead Ron.

16

00:02:37,366 --> 00:02:42,746

Ron Garan: The MSG activities are complete.

17

00:02:42,746 --> 00:02:43,686

Thanks for all the help.

18

00:02:43,826 --> 00:02:45,216

POC: And we copy that Ron.

19

00:02:45,216 --> 00:02:46,636

Thank you very much for your hard work.

20

00:02:46,636 --> 00:02:47,586

We appreciate it today.

21

00:02:50,566 --> 00:02:59,246

Commentator: That was astronaut Ron Garan
talking with the Payloads Operations Center

22

00:02:59,286 --> 00:03:02,256

at Marshall Spaceflight Center
at Huntsville, Alabama.

23
00:03:02,506 --> 00:03:11,356
Satoshi Furukawa: Tsukuba, Station on two.

24
00:03:11,356 --> 00:03:12,496
Did you get the image?

25
00:03:14,346 --> 00:03:16,426
Tsukuba: Satoshi, yes indeed.

26
00:03:16,426 --> 00:03:18,966
We were just talking about it and we verified
