

1  
00:02:52,439 --> 00:02:57,669  
Oh about staying here and preparations?  
We stay here for about two weeks

2  
00:02:57,669 --> 00:03:00,419  
before launch.

3  
00:03:00,419 --> 00:03:06,669  
and we spend this time doing s  
ome preparations, some relaxation,

4  
00:03:06,669 --> 00:03:13,040  
gives us time to take care of loose ends  
with our family, with our friends, make sure

5  
00:03:13,040 --> 00:03:16,519  
we have all our bills paid  
before we leave Earth.

6  
00:03:16,519 --> 00:03:22,540  
It's a time to get ready for your spaceflight.

7  
00:03:27,909 --> 00:03:34,519  
And you have to get used to this.  
So you see the face of astronauts a bit swollen.

8  
00:03:34,519 --> 00:03:36,750  
They feel like they are a bit...

9  
00:03:36,750 --> 00:03:41,519  
Ah. I like this kind of weather

10  
00:03:41,519 --> 00:03:45,439  
Cold and crisp.

11  
00:03:45,439 --> 00:03:49,099  
It's so cold I see your  
microphone has a fur coat.

12

00:04:06,839 --> 00:04:13,309

This will be the second time for a New Year  
in space. It's a great place to be.

13

00:04:15,379 --> 00:04:20,180

Well I think we have a very long  
New Year because

14

00:04:20,180 --> 00:04:23,389

there's a lot of different places on the  
planet. Every time it's another New Year.
