

1
00:00:01,086 --> 00:00:02,016
Hi I'm Dan Burbank.

2
00:00:02,156 --> 00:00:05,386
Commander of the Expedition 30 crew
aboard the International Space Station.

3
00:00:05,976 --> 00:00:10,016
This is my third flight in space and I'm
still amazed by the view of Earth from orbit

4
00:00:10,266 --> 00:00:12,836
and the work we're performing along
with our international partners.

5
00:00:14,136 --> 00:00:16,366
I've been very fortunate to
have a great career with NASA.

6
00:00:16,806 --> 00:00:20,586
But now we need new astronauts to continue
working aboard the International Space Station

7
00:00:20,796 --> 00:00:24,466
conducting world-class scientific research
for the benefit of everyone on Earth.

8
00:00:25,016 --> 00:00:29,936
In addition, we need a new class of astronauts
to build and fly Orion, our new spacecraft,

9
00:00:29,936 --> 00:00:32,756
designed to launch on the
powerful Space Launch System rocket

10
00:00:33,106 --> 00:00:36,016
that when fully evolved will be the
most powerful rocket ever built.

11

00:00:36,736 --> 00:00:40,586

Those new astronauts will be sent beyond Earth orbit to explore deep space.

12

00:00:41,526 --> 00:00:45,996

And NASA astronauts will further NASA's efforts to partner with industry

13

00:00:45,996 --> 00:00:49,256

to provide commercial capability for transportation to the space station.

14

00:00:49,876 --> 00:00:53,976

Our slogan is, "Fly NASA where the sky is not the limit."
