

1
00:00:41,250 --> 00:00:40,080
thank you sunny good morning tell us

2
00:00:43,410 --> 00:00:41,260
what's about to happen here at the

3
00:00:56,939 --> 00:00:43,420
condensable so we're getting ready to

4
00:01:31,950 --> 00:00:56,949
leave and for them to say good luck to

5
00:01:31,960 --> 00:01:39,570
shall we let's go

6
00:01:48,800 --> 00:01:41,880
we're like clearing the path for

7
00:01:48,810 --> 00:02:01,780
you look good stay there

8
00:02:01,790 --> 00:02:07,530
together

9
00:02:07,540 --> 00:02:19,630
I'm up

10
00:02:32,900 --> 00:02:30,050
please your questions I think the most

11
00:02:35,180 --> 00:02:32,910
important is our teamwork together as a

12
00:02:36,830 --> 00:02:35,190
crew and we've taken advantage of the

13
00:02:38,510 --> 00:02:36,840

two and a half years to learn about each

14

00:02:41,180 --> 00:02:38,520

other in our families and I think we're

15

00:02:42,620 --> 00:02:41,190

we're one big team I think the most

16

00:02:51,190 --> 00:02:42,630

difficult part is probably leaving our

17

00:03:05,710 --> 00:03:04,270

a parallel is I think the Olympics you

18

00:03:06,729 --> 00:03:05,720

know it's gonna be the same time that

19

00:03:08,430 --> 00:03:06,739

we're up there

20

00:03:10,690 --> 00:03:08,440

it means cooperation and friendship

21

00:03:12,490 --> 00:03:10,700

learning about each other understanding

22

00:03:26,500 --> 00:03:12,500

each other and making for a better

23

00:03:29,830 --> 00:03:26,510

planet a better world absolutely and I

24

00:03:31,720 --> 00:03:29,840

hope I hope what we do is a slight role

25

00:03:34,360 --> 00:03:31,730

model for the rest of the world about

26
00:03:36,580 --> 00:03:34,370
how much you can do with International

27
00:03:39,490 --> 00:03:36,590
Cooperation the Space Station is simply

28
00:03:41,740 --> 00:03:39,500
amazing engineering project scientific

29
00:03:45,640 --> 00:03:41,750
laboratory and that's what we can do

30
00:03:55,640 --> 00:03:45,650
when we put our minds together next

31
00:04:00,509 --> 00:03:58,290
so it's a it's a little bit of a

32
00:04:03,900 --> 00:04:00,519
relaxing time since we're away from all

33
00:04:05,220 --> 00:04:03,910
the busyness of the normal life and our

34
00:04:06,780 --> 00:04:05,230
families will miss our families but

35
00:04:08,670 --> 00:04:06,790
we'll have a chance to get some rest

36
00:04:10,740 --> 00:04:08,680
before we actually launch we have a

37
00:04:12,120 --> 00:04:10,750
chance to prepare for the very busy

38
00:04:14,070 --> 00:04:12,130

schedule that we'll have when we get

39

00:04:17,039 --> 00:04:14,080

there right away we'll have a Japanese

40

00:04:20,190 --> 00:04:17,049

HTV followed by progress followed by

41

00:04:21,719 --> 00:04:20,200

some spacewalks Russian and US OS so

42

00:04:23,820 --> 00:04:21,729

it's going to be really busy so two

43

00:04:25,920 --> 00:04:23,830

weeks down there will allow us to do our

44

00:04:28,230 --> 00:04:25,930

final preparations and get rested up and

45

00:04:29,760 --> 00:04:28,240

ready to go we're all we're all getting

46

00:04:30,960 --> 00:04:29,770

excited to launch in the Soyuz just
