

1
00:00:00,506 --> 00:00:05,531
[Silence]

2
00:00:06,031 --> 00:00:11,056
[Background Talk]

3
00:00:11,556 --> 00:00:15,486
>> And there is the
hatch opening.

4
00:00:15,746 --> 00:00:16,016
>> [Talking in foreign
language] OK.

5
00:00:16,016 --> 00:00:17,046
Yes. That was the -

6
00:00:17,046 --> 00:00:20,136
>> Aki Hoshide returning to the
International Space Station,

7
00:00:20,136 --> 00:00:23,416
first to float in and be greeted
by the residents of the complex.

8
00:00:23,416 --> 00:00:27,566
Suni Williams next.

9
00:00:27,946 --> 00:00:29,066
>> [talking in foreign
language] Something is pausing.

10
00:00:29,596 --> 00:00:32,686
OK. I did not [inaudible].

11
00:00:32,686 --> 00:00:37,226
>> Williams spent
almost 200 days

12

00:00:37,226 --> 00:00:41,026
on board the International
Space Station in 2006 and 2007,

13

00:00:41,026 --> 00:00:43,946
and there is the veteran Russian
cosmonaut Yuri Malenchenko

14

00:00:44,526 --> 00:00:47,646
floating into the Rassvet
module, being greeted

15

00:00:47,646 --> 00:00:48,196
by [Inaudible] and [Inaudible].

16

00:00:48,196 --> 00:00:51,026
All six crew members
now together

17

00:00:51,026 --> 00:00:53,036
on board the International
Space Station.

18

00:00:55,826 --> 00:00:58,086
The official opening
of the hatches coming

19

00:00:58,086 --> 00:01:04,466
at 11:23 A.M. Moscow time,
2:23 A.M. Central Time

20

00:01:04,996 --> 00:01:08,826
on Tuesday morning, July
17th on the 37th anniversary

21

00:01:08,826 --> 00:01:11,166
of the docking of
Apollo and Soyuz

22

00:01:11,486 --> 00:01:14,516
in that historic mission
more than three decades ago.

23

00:01:16,016 --> 00:01:21,106
>> Moscow, if you can
read us, [inaudible].

24

00:01:21,106 --> 00:01:21,416
[talking in foreign
language] Guys,

25

00:01:21,416 --> 00:01:24,876
we can see really, really clear.

26

00:01:25,006 --> 00:01:26,576
How do you read us?

27

00:01:26,576 --> 00:01:28,826
We read you loud and clear.

28

00:01:28,826 --> 00:01:30,016
[Inaudible] 555.

29

00:01:30,306 --> 00:01:32,136
Morning, this is Mr. DaVito.

30

00:01:32,516 --> 00:01:34,316
Well, first of all, I
wanted to congratulate you

31

00:01:34,316 --> 00:01:35,546
on a successful docking.

32

00:01:35,866 --> 00:01:38,716
I wanted to say congratulations

33

00:01:38,716 --> 00:01:40,456
on having once again

extended the crew

34

00:01:40,456 --> 00:01:41,986
to a full complement of six.

35

00:01:42,546 --> 00:01:44,326
A real thrill to see all of you

36

00:01:44,396 --> 00:01:46,386
in good health and
in great spirits.

37

00:01:46,526 --> 00:01:48,416
Have a successful mission.

38

00:01:48,776 --> 00:01:51,476
The question to the
newly arrived crew.

39

00:01:52,416 --> 00:01:53,926
What are the first impressions

40

00:01:54,186 --> 00:01:57,066
of having just arrived
on the station?

41

00:01:57,066 --> 00:01:58,476
What does it feel like?

42

00:01:58,476 --> 00:01:59,996
What does it look like?

43

00:01:59,996 --> 00:02:01,076
Feels great.

44

00:02:01,076 --> 00:02:06,346
It's just like a homecoming of
sorts, but we can see right away

45

00:02:06,346 --> 00:02:10,626

that some things have changed,
but it's in great condition.
