

1
00:00:00,500 --> 00:03:35,110
[Inaudible Group]

2
00:03:35,110 --> 00:03:37,710
>> Different colleagues, please
your questions to the crew.

3
00:03:37,710 --> 00:03:38,650
How are you feeling?

4
00:03:38,650 --> 00:03:40,070
How's your mood?

5
00:03:40,070 --> 00:03:42,210
The mood is great,
we're ready to work.

6
00:03:42,210 --> 00:03:45,170
So many people came
to see us off.

7
00:03:45,170 --> 00:03:48,360
And of course the mood
is great, I'm excited.

8
00:03:48,360 --> 00:03:51,310
Tell us about the
mission program.

9
00:03:51,310 --> 00:03:55,440
Anatola Yakaloches [phonetic],
the specialist, he is not here,

10
00:03:55,440 --> 00:04:00,720
but talking about the mission
goals, they're very interesting.

11
00:04:00,720 --> 00:04:05,580
The mission -- the expedition

is full of different tasks.

12

00:04:05,580 --> 00:04:07,860

We'll have a few space walks,

13

00:04:07,860 --> 00:04:10,760

there will be different
transportation vehicles coming

14

00:04:10,760 --> 00:04:14,960

from Europe, NASA,
Russian vehicles.

15

00:04:14,960 --> 00:04:17,620

Could you please tell
us, are you going

16

00:04:17,620 --> 00:04:21,030

to be celebrating
the Pancake Day?

17

00:04:21,030 --> 00:04:22,120

Of course.

18

00:04:22,120 --> 00:04:25,180

Of course we will
be celebrating.

19

00:04:25,180 --> 00:04:28,130

Tomorrow's going to be a
rather difficult day for us.

20

00:04:28,130 --> 00:04:30,280

It's going to be
Soyuz fit check,

21

00:04:30,280 --> 00:04:33,120

and we will busy 'til
very late in the day.

22

00:04:33,120 --> 00:04:36,150

But if we have some time, of course we will be celebrating.

23

00:04:36,150 --> 00:04:39,730

>> Well here we are on the final day in Star City.

24

00:04:39,730 --> 00:04:43,870

We just had a farewell breakfast inside this Cosmonaut Solovia

25

00:04:43,870 --> 00:04:45,950

[phonetic], had a few pictures out here in front

26

00:04:45,950 --> 00:04:48,400

of this historical place, and we're about to board the bus

27

00:04:48,400 --> 00:04:49,810

and head to Kazakhstan.

28

00:04:49,810 --> 00:04:51,080

Because of the weather we have

29

00:04:51,080 --> 00:04:54,660

to juggle airplanes a little bit, so myself

30

00:04:54,660 --> 00:04:56,300

and the prime crew will be heading out now,

31

00:04:56,300 --> 00:04:58,030

and Mike will be waiting for a few hours

32

00:04:58,030 --> 00:04:59,580

for another plane
to come pick him up.

33

00:04:59,580 --> 00:05:01,700

So we'll link back
up in Kazakhstan

34

00:05:01,700 --> 00:05:03,450

and have our first fit
check tomorrow morning,

35

00:05:03,450 --> 00:05:06,090

and get on with business to
the countdown to our launch
